ACKNOWLEDGEMENTS

My sincere gratitude goes to the following, without whom my Masters study and this research will not be completed.

I would like to express my deeply gratitude to my thesis advisor, Assist. Prof. Dr. Supat Chaiyakul for her meaningful advice, guidance and support. Her patience, kindness and encouragement are appreciated.

I am also indebted to Assoc. Prof. Dr. Orapin Kerdchoechuen, my co-advisor, for her kind assistance, helpful consultation and everlasting support. Moreover, I am thankful to her to allow me to do a research at King's Mongkut University of Technology (Bangkuntien) for 10 months.

I wish to express gratefully appreciation to Assoc. Prof. Dr. Natta Laohakuljit who as a member of the thesis committee for her valuable suggestions and comments.

The acknowledgement is also given to all staffs of the Faculty of Public Health, Mahidol University and the Faculty of Biotechnology, King's Mongkut University of Technology (Bangkuntien) for their assistance.

I am also grateful to technician staffs at Sithiporn Associates and Metrohm Thailand for allowing me to use Differential scanning calorimeter (DSC) and Rheometer.

Ultimately, I am thankful to my family and my friends for their endless love, understanding, support and encouragement, which carried me through.

This research was financial supported by National Research Council of Thailand (NRCT).

Kantree Ritruengdech
