

**Goodness portion of the present thesis is dedicated to  
my parents, relatives and the entire teaching staffs**

## **ACKNOWLEDGEMENTS**

First of all, I would like to express my deepest gratitude and sincere appreciation to my advisor, Assoc. Professor Dr. Jintanaporn Wattanathorn, who has been a tremendous mentor and has supported me throughout the study. She has encouraged and had the patience for me. Her role model helps shaping me to develop as a scientist today.

I would like to extend the greatest appreciation to examining committees, Assoc. Prof. Dr. PaneeSirisa-ard, Asst. Prof. Dr. Supaporn Muchimapura, Asst. Prof. Panakaporn Wannanon, Assoc. Prof. Terdthai Tong-un and Dr. Wipawee Thukhummee for their kindness, valuable suggestions and encouragement.

I am grateful for all teachers who not only teach but also put their faith in me.

I would like to thank to all of my friends, members of Integrative Complementary Alternative Medicine Research and Development Center and the family member of my advisor for their love, care, helpfulness and encouragement.

I am indebted to those experimental animals who sacrificed their lives for our studies.

This dissertation would not have been accomplished without financial support from National Research Council of Thailand, the Higher Education Research Promotion and National Research University Project of Thailand, Office of the Higher Education Commission, through the Food and Functional Food Research Cluster of Khon Kaen University, Faculty of Medicine, Khon Kaen University (Grant number 55111) and the Integrative Complementary Alternative Medicine Research and Development Center (ICAM), Khon Kaen University.

Last but not the least, I would like to thank to my beloved family for their unconditional love and support. They have continually encouraged me to pursue my dreams.
