

ACKNOWLEDGEMENTS

I would like to express the deepest appreciation to Assist. Prof. Dr. Yuporn Puechkamut for her supervision, advice and guidance. She has the attitude and substance of a genius; she continually and convincingly conveyed a spirit in regard to research and teaching. Without her guidance persistent help this thesis would not have been possible.

I am grateful to my committee members, Assoc. Prof. Dr. Ratiporn Haruenkit, Assoc. Praphan Pinsiridom, Assist. Prof. Dr. Varipat Areekul and Assist. Prof. Dr. Pimporn Pornchaloempong for their supervision and guidance.

I would like to thank Rajamangala University of Technology Pra Nakhon for scholarship donates and National Research Council of Thailand (NRCT) for research grants category graduate year 2010.

In addition, a thank you to Burapachep Limited and Cargill Siam Limited for carrageenan, Grand Chemical Group for $MgSO_4$ and Chiang Mai Field Crops Research Center and Sukhothai plant and Plant Production Material Technical Service Center for all of soybean varieties.

Special appreciation also goes Dr. Suchada Maisont, Dr. Thongchai Putthongsiri, Mr. Thanawoot Parinyapatthanaboot, friends and all staffs in the Faculty of Agro-Industry, KMITL for their help, friendship and morale support.

Finally, I would like to express my special thanks and gratitude to my parents who continually give me loves and morale supports which serve as my strength and inspiration throughout my life and education.

Woralak Panyathitipong
