

TABLE OF CONTENTS

	PAGE
ABSTRACT.....	I
ACKNOWLEDGEMENTS.....	III
TABLE OF CONTENTS.....	IV
LIST OF TABLES.....	VI
LIST OF FIGURES.....	VIII
CHAPTER 1 INTRODUCTION.....	1
CHAPTER 2 LITERATURE REVIEWS.....	3
2.1 Factors involved tofu making.....	4
2.2 Varieties of tofu.....	10
2.3 Tofu powder.....	12
2.4 Utilization of soy protein and tofu powder in meat emulsion products.....	12
2.5 Utilization of hydrocolloid in meat products.....	15
CHAPTER 3 MATERIALS AND METHODS.....	17
3.1 Raw materials.....	17
3.2 Reagents.....	17
3.3 Equipments.....	17
3.4 Methods.....	18
CHAPTER 4 RESULTS AND DISCUSSIONS.....	28
4.1 Effect of soybean varieties, coagulants and drying method of tofu powder production.....	28
4.2 Physicochemical properties of the emulsion gels prerepared from tofu powder and surimi.....	33
4.3 Development of the surimi emulsion gels from tofu powder that yielded product with satisfactory sensory quality.....	41

TABLE OF CONTENTS (CONT.)

	PAGE
CHAPTER 5 CONCLUSTIONS	53
REFERENCES	54
APPENDIX	
A Preparation of tofu powder, pre-emulsion and the emulsion gel.....	62
B Sensory evaluation form.....	67
C Demographics information of consumer from acceptance testing.....	73
D Chemical composition of the emulsion gel.....	78
E Method for determination chemical composition.....	80
AUTHOR BIOGRAPHY	83

LIST OF TABLES

TABLE		PAGE
3.1	The basic formulation of surimi emulsion gel.....	23
3.2	Levels (%) of variables in surimi emulsion gel according to experimental design	25
4.1	Chemical composition of three soybean varieties.....	28
4.2	Color and solid content of soy milk prepared from three soybean varieties.....	29
4.3	Chemical composition of tofu powder from three soybean varieties.....	29
4.4	Correlation coefficients of soybean varieties on quality of soymilk and tofu powder..	30
4.5	Effect of soybean varieties on functional properties and yield of tofu powder.....	31
4.6	Effect of the type of coagulants on function properties and yield tofu powder.....	32
4.7	Effect of drying methods on functional properties and moisture content of tofu powder.....	32
4.8	Effect of tofu powder on functionality of surimi emulsion gels.....	33
4.9	Effect of tofu powder on texture of surimi emulsion gel.....	35
4.10	Effect of carrageenan on functionality of the gel that replaced 80% of surimi with tofu powder.....	37
4.11	Effect of carrageenan on texture of the gel that replaced 80% of surimi with tofu powder.....	38
4.12	Central composite design arrangement and experimental result for the response variables of surimi emulsion gel by 9-points Hedonic Scale.....	41
4.13	Central composite design arrangement and experimental result for the response variables of surimi emulsion gel by QDA.....	42
4.14	Central composite design arrangement and experimental result for the response variables of surimi emulsion gel by TPA.....	43
4.15	Description and scale of the sensory attributes of surimi emulsion gel for QDA.....	43
4.16	Analysis of variance (ANOVA) showing the linear, quadratic interaction and the lack of fit of the response variables.....	44
4.17	Estimated regression coefficients of the fitted second-order polynomial for the response variables.....	46

LIST OF TABLES (CONT.)

TABLE		PAGE
4.18	Predicted and experimental values of the responses at optimum condition.....	51
4.19	Means value of consumer giving degree of liking of surimi emulsion gel.....	52
4.20	Number of consumer giving degree of the liking of all attributes.....	52
A1	The basic formulation of surimi emulsion gel with tofu powder at various concentrations.....	63
A2	The basic formulation of surimi tofu emulsion gel.....	64
C1	General information of the consumers.....	74
C2	Consumer behavior and consumer opinion.....	76
D1	Proximate composition of optimum formulation of surimi tofu emulsion gel.....	79

LIST OF FIGURES

FIGURE	PAGE
2.1 The gelation mechanism of soy protein with glucono delta lactone (GDL) or Ca ²⁺	7
3.1 Flow diagrams for soymilk and tofu powder production.....	19
3.2 Flow diagrams for preparation of pre-emulsion from tofu powder and oil.....	22
3.3 Flow diagrams for preparation of emulsion gel from tofu powder and surimi.....	22
4.1 Scanning electron micrographs of surimi emulsion gel formulated with tofu powder at various concentrations.....	36
4.2 Scanning electron micrographs of surimi emulsion gel formulated with 80% tofu powder and carrageenan at various concentrations.....	39
4.3 Response surface plot of the effect of amount of soybean oil and carrageenan concentration on preference test.....	47
4.4 Response surface plot of the effect of amount of soybean oil and carrageenan concentration on QDA.....	48
4.5 Response surface plot of the effect of amount of soybean oil and carrageenan concentration on TPA.....	48
4.6 Desirability of the response variable optimize formulation of surimi emulsion gel.....	50
A1 The characteristic of surimi emulsion gel with tofu powder at various concentrations.....	64
A2 Cross section of surimi emulsion with tofu powder at various concentratrations	65
A3 The filler for forming emulsion gel.....	65
A4 The mold for forming emulsion gel.....	66
