

ACKNOWLEDGEMENTS

Firstly, I would like to express my sincere appreciation and gratitude to my advisor, Assoc. Prof. Dr. Waraporn Putalun, for her advice, support, patience, and constant encouragement throughout the course of research work and the preparation of this thesis.

Secondly, sincere thanks and appreciation are also to Assist. Prof. Dr. Srisomporn Preeprame, Dr. Thaweesak Juengwatanatrakul and Assoc. Prof. Dr. Chaiyo Chaichantipyuth for their help and suggestions.

My sincere thanks are also to the members of plant tissue culture laboratory and undergraduate students (who are volunteer staff in our laboratory during summer vocation) for all advices, helpful and meaningful friendship.

From my first year of bachelor degree until now, it has been almost seven years of my study in the faculty of Pharmaceuticals Science, Khon Kaen University. The quality of educational institution where was giving me many of experience. A place that plenty of my memorial with all friends, teachers and also staff.

This thesis is partially financial supported from The Graduated School, Khon Kaen University and The National Research Council of Thailand, which are also sincerely acknowledged.

Finally, I wish to thank my family for their love and encouragement which enabled me to achieve this goal.

Orapin Udomsin
