ACKNOWLEDGEMENTS

First and foremost, I would like to express my sincerest gratitude to my major advisor, Dr. Uthaiwan Suttisansanee, for the valuable guidance and constant encouragement throughout my thesis. Deepest gratitude is also due to co-advisors and examination committees, Asst. Prof. Dr. Somsri Charoenkiatkul and Dr. Warangkana Srichamnong, for their knowledge and valuable guidance to complete the thesis. I especially thank Dr. Saranya Srisuwan, the external chair committee of this thesis, for her valuable recommendation.

Besides, I would like to thank Institute of Nutrition, Mahidol University for providing me a good environment and laboratory facilities. I am not forgetting to thank Dr. Kalyarat Kruawan, Ms. Parunya Thiyajai, Ms. Jutamat Tonglim, Ms. Rachna Kaur Kukreja and other supporters for laboratory techniques and valuable information. I also thank all educational and research supporting staffs and my friends from Institute of Nutrition for their helpfulness and kindness. As well, I offer my sincere appreciation to all teachers of undergraduate and graduated program for valuable knowledge and experience.

This research work is supported by the research grant from The National Research Council of Thailand (NRCT) in 2015.

Finally, I wish to express my love and gratitude to my beloved families, especially my mother, Assoc. Prof. Pranee Thuphairo, for their endless love, encouragement and understanding which are given to me throughout my thesis and other problems. This thesis would not have been successful without the support of the mentioned people.

Kantamane Thuphairo
