LIST OF TABLES	xiii
LIST OF FIGURES	xiv
LIST OF SYSBOLS	xvi
 CHAPTER	
1. INTRODUCTION	1
1.1 Research Rationale	1
1.2 Objectives	4
1.3 Scopes	4
1.4 Expected Benefits	5
1.5 Outline of Dissertation	6
 2. BACKGROUND	7
2.1 Rice	7
2.1.1 Effects of milling, washing and cooking on nutritional values of rice	7
2.1.2 Rice fortification and coating	9
2.2 Natural antioxidants	11
2.3 Coating	12
2.3.1 Pan coating	13

	PAGE
2.3.2 Dip coating	13
2.3.3 Spray coating	14
2.4 Fluidization	14
2.4.1 Principle of fluidization	14
2.4.2 Minimum fluidization velocity	15
2.5 Fluidized bed coating	19
2.5.1 Top-spray fluidized bed coating	20
2.5.2 Bottom-spray fluidized bed coating	21
2.5.3 Tangential spray or rotary fluidized bed coating	23
2.5.4 Continuous fluidized bed coating	24
2.6 Atomization of coating solution	25
2.7 Collision mechanisms of droplet on particle surface	27
2.8 Coating layer growth mechanisms	28
2.9 Key process variables for fluidized bed coating	30
2.10 Performance of fluidized bed coating	32
 3. EFFECTS OF INLET FLUIDIZING AIR TEMPERATURE AND SPRAY RATE OF COATING SOLUTION ON QUALITY ATTRIBUTES OF TURMERIC EXTRACT COATED RICE USING TOP-SPRAY FLUIDIZED BED COATING TECHNIQUE	 40
3.1 Introduction	40
3.2 Materials and methods	42
3.2.1 Materials	42
3.2.2 Top-spray fluidized bed coating configuration	43

	PAGE
3.2.3 Turmeric extract solution preparation	43
3.2.4 Coating procedure	44
3.2.5 Moisture content determination	45
3.2.6 Fissure determination	46
3.2.7 Determination of head coated rice yield	46
3.2.8 Color measurement	47
3.2.9 Scanning electron microscopy	47
3.2.10 Textural quality measurement	47
3.2.11 Extraction of TECR and cooked TECR to evaluate TAC, TPC and curcuminoids content	48
3.2.12 Total phenolics content determination	48
3.2.13 Total antioxidant capacity determination	50
3.2.14 Estimation of curcuminoids content	51
3.2.15 Statistical analysis	52
3.3 Results and discussion	52
3.3.1 Effect of operating parameters on final MC of TECR	52
3.3.2 Fissure and head coated rice yield of TECR	54
3.3.3 Color of TECR	56
3.3.4 Textural properties of TECR	58
3.3.5 Total phenolics content of TECR and cooked TECR	59
3.3.6 Total antioxidant capacity of TECR and cooked TECR	60
3.3.7 Curcuminoids content	62

PAGE

4. PERFORMANCE EVALUATION OF TOP-SPRAY FLUIDIZED BED COATING FOR PRODUCING TURMERIC EXTRACT COATED RICE	64
4.1 Introduction	64
4.2 Materials and methods	67
4.2.1 Raw materials	67
4.2.2 Experimental set-up	67
4.2.3 Coating solution preparation	69
4.2.4 Coating procedure	69
4.2.5 Moisture content determination	70
4.2.6 Fissure determination	70
4.2.7 Head coated rice yield determination	70
4.2.8 Color measurement	70
4.2.9 Uncoated white rice kernels determination	71
4.2.10 Total phenolics content determination for coating efficiency evaluation	71
4.2.11 Specific energy consumption determination	73
4.2.12 Statistical analysis	73
4.3 Results and discussion	74
4.3.1 Moisture content	74
4.3.2 Fissure and head coated rice yield	79
4.3.3 Color of TECE	81
4.3.4 Uncoated white rice kernels	83
4.3.5 Coating efficiency	85

	PAGE
4.3.6 Specific energy consumption	88
5. CONCLUSIONS AND RECOMMENDATIONS	91
5.1 Conclusions	91
5.3 Recommendations	94
REFERENCES	95
APPENDIX	
Special topic performed at Department of Bioresource Engineering, Faculty of Agricultural and Environmental Sciences, McGill University (Mcdonald Campus), Canada under the supervising of Prof. Dr. G.S. Vijaya Raghavan	112
CURRICULUM VITAE	136
