

ACKNOWLEDGEMENTS

I would like to express my sincere thanks and appreciation to many people who inspire, encourage, and support me in completing my thesis. First of all, I would like to thank my parents, brothers, and sisters who have inspired me to learn until graduation.

Also, I offer my sincerest gratitude to my thesis advisor, Assoc. Prof. Dr. Prayong Klanrit who has supported me with her knowledge, advice and guidance throughout my time in this research. Special gratitude to Assoc. Prof. Dr. Napasup Lerdpreedakorn for her kind suggestions and encouragement. Without them, this thesis would not have been completed. I would also like to express my appreciation to the thesis committee, Dr. Chatchai Muangpatom, Dr. Chatree Nakagul, and Asst. Prof. Dr. Rapeeporn Sroinam for their suggestions which helped me improve and complete this thesis.

I would like to be thankful to three experts, Assoc. Prof. Dr. Chanida Muangkaew, Dr. Sirinun Krisanachinda, and Dr. Supatra Wanpen, who helped check my research instruments and also gave useful suggestions to make them more valid and reliable. Thanks are due to Mattayomsuksa 6/9 students of the academic year 2010 in Nongbuapittayakarn School for their cooperation in participating in my experimental study.

Sincere thanks are made to financial support from the National Research Council of Thailand (NRCT). Special thanks to Assoc. Prof. Dr. Prayoon Arsanam, Dr. Andrew Paterson, Mr. Ron Fratzke and all my friends, Pao and Julian Wright, and Pongsawat Pongkan for their kindness and valuable time in reviewing and examining this study.

Finally, I am particularly grateful to my husband Saisilp and son Settavut for their support, patience, understanding and valuable time throughout my study. The success of this thesis and completion of my degree at Udon Thani Rajabhat University are dedicated to them.
