

## LIST OF FIGURES

Figures	Page
1 Roots of <i>A. racemosus</i> .....	4
2 Stems of <i>A. racemosus</i> .....	4
3 Leaves of <i>A. racemosus</i> .....	4
4 Flowers of <i>A. racemosus</i> .....	5
5 Fruits of <i>A. racemosus</i> .....	5
6 Structures of steroidal saponins 1–10 isolated from <i>A. racemosus</i> roots, divided in four major structural types (I–IV).....	6
7 Basic structures of sapogenins: a triterpenoid and a steroid.....	19
8 Preparation of fractional extracts.....	23
9 Schematic of the concentration the extract and antifungal agent using checkerboard synergy testing method on 96-wells plate.....	28
10 The appearance of <i>A. racemosus</i> roots successively extracts a: Hexane extract (AR-H), b: Ethanolic extract (AR-E) c: Aqueous extract-A (AR-A), d: aqueous extract-B (AR-B) e: Sediment extract (AR-S).....	31
11 The appearance of saponin enriched extract of <i>A. racemosus</i> roots (AR-En).....	31
12 TLC chromatograms of hexane extracts (AR-H) and ethanolic extracts (AR-E) of <i>A. racemosus</i> .....	33
13 TLC chromatograms of aqueous-A extracts (AR-A) and aqueous-B extracts (AR-B) of <i>A. racemosus</i> .....	34
14 TLC chromatograms of sediment extracts (AR-S), saponin enriched extract (AR-En) and ethanolic extract (AR-E) of <i>A. racemosus</i> .....	35
15 The proposed MS/MS fragmentation structures of shatavarin IV.....	36
16 Chromatograms of standard shatavarin IV detected by LC-MS/MS...	37
17 Calibration curve of shatavarin IV detected by LC-MS/MS.....	37

## LIST OF FIGURES (CONT.)

Figures	Page
18 Chromatogram of (a): the saponin enriched extract of <i>A. racemosus</i> from Rayong (AR3-En) compared with (b): shatavarin IV detected by LC-MS/MS.....	38
19 The appearance of <i>A. racemosus</i> extract comparing between Days 0 as a control and Day 30.....	44
20 Percentage of saponin equivalent to shatavarin IV in <i>A. racemosus</i> extracts compare between days 0 as a control and 30 days as final day (AR1-E: Ethanolic extract from Tak, AR1-E: Ethanolic extract from Rayong).....	45
21 Hemacytometer counting chamber (yeast cells). Areas marked A, B, C, and D are used to count yeast cells.....	63
