## ACKNOWLEDGEMENTS

It is a privilege to me to acknowledge the unconditional support of my devoted advisory committee, Dr. Phanuphong Chaiwut and Dr. Punyawatt Pintathong, who are the teacher, counselor, and mentor during my academic years. Their immensely wisdom, advice, inspiration, motivation and constant support have made this thesis possible.

I sincerely express my appreciation to the members of my defense committee, Assoc. Prof. Dr. Panvipa Krisdaphong, Assoc. Prof. Pimporn Leelapornpisid, and Dr. Nisakorn Saewan for their cooperation and suggestions have improved the quality of my thesis considerably.

This study was partially supported by Thailand Research Fund (TRF) and the Skin Biotech (Thailand) Co, Ltd. under the TRF-MAG window I grant in the part of extraction solvent effect and HPLC fingerprint studies. The author also thank to the National Research Council of Thailand (NRCT) for partially support in the study of sample part effect and antimicrobial activity.

Being a member of the School of Cosmetic Science has been a wonderful academic experience. I would like to give special deep thanks to current and past S2 408 laboratory members who gave me the amazing work time.

My deepest recognition goes to my beloved family. Their supports help me in any imaginable way to achieve my aims and fulfill my dreams. They have been an inexhaustible source of love, patience, understanding, encouragement and inspiration. The last sentence is willing dedicated to the faith and destiny bring me here this day.
