

ACKNOWLEDGEMENT

The thesis would not be completed if there were no precious comments, suggestions, assistance and encouragement from many people whom I am greatly indebted. I would like to acknowledge my gratitude to all of them.

I am deeply appreciative to Dr. Witada Anukoonwattaka, my thesis advisor, for her invaluable guidance, support, and beneficial discussed time sacrificed throughout the period of thesis writing. My gratitude is extended to my thesis committees Dr. Prakarn Arphasil, Dr. Peera Charoenporn, and Dr. Chayawadee Chai-anant for their constructive comments and suggestions.

I am grateful for Dr. Tatre Jantarakolica, who gave me useful guidance of the regression method, Dr. Nessara Sukpanich, who inspired me to experience using STATA program and working on the industrial survey data.

I also wish to express my thankfulness to Bank of Thailand for granting me the scholarship during the two-year study period. In addition, special thanks go to staffs of the graduate program, the computer lab, and Puey Ungpakorn library for their generous assistance and hospitality.

My biggest thanks go to P'Chai. Not only has he edited the entire thesis, but he also teaches me the word "fighting for a matter of principle".

I could not have passed this tough time in studying without help from my friends and seniors, thank you everyone for providing good and warm environment throughout the period of the study at the graduate program.

I would like to express my deepest appreciation and gratitude to my beloved family: my mom, my dad, my sister, and my aunt for their love, care, support, and encouragement. I love you with all my life. For Kratai, I would like you to know that I love you with all my heart. Thank you for being always there for me. Special thanks go to Aum, we always have a great time when we are four together.

However, there are other people who have contributed to this thesis whom I do not mention here. I would like to say "thank you" to all of you.

Finally, any deficiencies, ambiguities and shortcomings in this thesis are solely my own responsibility. All comments and suggestions are welcomed.
