|---|-------------|
| TABLE OF CONTENTS | i |
| LIST OF TABLES | ii |
| LIST OF FIGURES | iv |
| LIST OF ABBREVIATIONS | viii |
| INTRODUCTION | 1 |
| Objective | 2 |
| Scope of work | 2 |
| Expected results | 2 |
| LITERATURE REVIEW | 3 |
| Biodiesel | 3 |
| Jatropha oil | 6 |
| Transesterification | 7 |
| Reactive distillation | 12 |
| MATERIALS AND METHODS | 20 |
| Process description | 20 |
| Steady state simulation | 21 |
| Dynamic simulation | 23 |
| RESULTS AND DISCUSSIONS | 24 |
| Structure of components | 24 |
| The conventional biodiesel production | 29 |
| The biodiesel production by reactive distillation | 38 |
| Base case of the reactive distillation column | 42 |
| The comparison between conventional and reactive distillation | 42 |
| The comparison between with and without recycle stream | 44 |
| Optimum parameters of reactive distillation | 45 |
| Dynamic simulation | 53 |
| CONCLUSION | 65 |
| RECOMMENDATIONS | 67 |
| LITERATURE CITED | 68 |
| APPENDIX | 73 |
