

LIST OF TABLES

TABLE	PAGE
2.1 Properties of hydrogen (Gupta, 2009)	8
2.2 Thermal physical properties at various temperatures of hydrogen molecules in the gas state (Department of Alternative Energy Development and Efficiency Ministry of Energy)	9
2.3 The heat capacity of the fuel types (Department of Alternative Energy Development and Efficiency)	10
2.4 Electrolysis cells and their specialties (Jensen et al., 2008)	13
3.1 Experimental conditions	54
3.2 Regression model of void fraction	55
4.1 Parameters of flowing electrolyte	59
4.2 Parameters of solution temperature	60
4.3 Parameters of materials	61
4.4 Parameters of frequency and duty cycle	62
A.1 Standard Reduction Potentials at 298.15 K	97
B.1 Levels of the factors	102
D.1 Data results of direct current	117
D.2 Data results of current characteristics at 30 A	118
D.3 Data results of current characteristics at 40 A	120
D.4 Data results of current characteristics at 50 A	122
D.5 Data results of solution temperature	124
