

ACKNOWLEDGEMENTS

The accomplishment of this study could not be achieved without the sincere support and assistance from several parties.

First, I wish to express my deepest appreciation to my advisor, Assistant Professor Dr. Ketvatee Porkaew, for her kind contribution of time and suggestion to my independent study.

I at the same time acknowledge the contribution of my classmates and friends who helped and encouraged me, as well as my colleagues who gave me some useful comments. I also must thank K. Siriwon Ritruamsup for her kind coordination along the way with my advisor.

Finally, I am extremely grateful to my family for their moral support and encouragement along the way in the process of this research.
