

## ACKNOWLEDGEMENT

I wish to take this opportunity to recognize some of the individuals who have guided and assisted me throughout my graduate education. I wish to express my deepest gratitude and appreciation to my thesis advisor, Assoc. Prof. Dr. Chatchai Tayapiwatana, for his kind supervision, invaluable guidance, patience and constant encouragement throughout the duration of this research study. I am truly grateful to Asst. Prof. Dr. Piyarat Nimmanpipug, my co-advisor. She has supported me tremendously in both of chemistry knowledge and analysis. My thanks are extended to Assoc. Prof. Dr. Vannajan Sanghiran Lee for giving the knowledge of running computational program. Moreover, I would like to acknowledge academic advisor, Assoc. Prof. Dr. Nipon Theera-Umpon and Asst. Prof. Dr. Sansanee Auephanwiriyakul for their valuable advice during my graduate studies. Additional, they have supported me in the knowledge of computational programming.

I would like to thank Biomedical Engineering Center, Faculty of Engineering for kindly providing me with the funding for studying and doing the research. Moreover, I wish to thank Ms. Auntika Udomsom, Mr. Kittichai Wattanajittikul and Ms. Pongsinee Thipsatheinkul for their kindly helps. Similarly, I am also indebted to all staffs and my friends in Biomedical Engineering Program, Faculty of Engineering; Division of Clinical immunology, Department of Medical Technology, Faculty of Associated Medical Science; Computational Simulation and Modeling Laboratory

(CSML), Department of Chemistry, Faculty of Science; and Computational Intelligence Research Laboratory (CIRL), Faculty of Engineering.

This work was supported by Thailand Research Fund (TRF), the National Centre for Genetic Engineering and Biotechnology (BIOTEC) of the National Science and Technology Development Agency (NSTDA) for funding, as well as National Electronics and Computer Technology (NECTEC) for Discovery Studio software.

I am grateful to Assoc. Prof. Dr. Viraphong Lulitanond, Faculty of Medicine, Khon Kaen University for kindly acting as chairperson of the examining committee as well as Assoc. Prof. Chatchai Tayapiwatana, Asst. Prof. Dr. Piyarat Nimmanpipug, and Asst. Prof. Dr. Sansanee Auephanwiriyaikul for kindly acting as the Examining Committee for this thesis.

Finally, I am indebted to my family for their unconditional support and believing in me. I would especially like to thank all graduate students and research assistant in the Biomedical Engineering Programme, Faculty of Engineering, the Department of Medical Technology, Faculty of Associated Medical Science and the Department of Chemistry, Faculty of Science.

Tanchanok Wisitponchai
