

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to my advisor, Dr. Uthai Wichai and co-advisors Assistant Professor Boonjira Rutnakornpituk. I greatly appreciated the guidance, support, and encouragement throughout the completion of my research. Deeply thanks are also extended to Associate Professor Dr. Sutatip Pongcharoen from Department of Medicine, Faculty of Medicine for the use of facilities, equipment, glassware and chemical in cytotoxicity MTT assay. My deepest thanks go to Associate Professor Dr. Anchalee Srichamroen, department of Agro-industry, Faculty of Agriculture, Natural Resources and Environment, for kindly giving me a Caco-2 cell line. I also would like to give special thanks to all thesis committee members, and intensely grateful for their helpful comments and suggestions.

I wish to acknowledge all staffs of Department of Chemistry, Faculty of Sciences, Naresuan University, especially Uthai's Research Group for their assistance, supportive and friendship.

I would like to thank Center of Excellence for Innovation in Chemistry: Postgraduate Education and Research Program in Chemistry (PERCH-CIC) for tuition fee, stipend as well as research budgets.

The friendship and encouragement given to me by my classmates is also appreciated, and I wish to give specially thanks to my mother, sister and brother for their unfailing love, understanding and patient.

Finally, I would like to express my gratefulness to all others for all supports that made me complete this thesis but are not named in this acknowledgement.

Above all, my praises and thanks to God, the Almighty, for all of blessings throughout my research work to complete the research successfully, for having made everything possibly by giving me strength and courage to do this research.

Arpon Pongkasetkam
