

## LIST OF FIGURES

Figure	Page
<b>LITERRATURES REVIEW</b>	
1. Global distribution of malaria transmission risk.	6
2. Malaria cases in Thailand from 1972 to 2005	8
3. Parasite life cycle and pathogenesis of <i>Plasmodium falciparum</i> malaria	10
4. The chemical structure of antimalarial drugs	21, 22
5. The mechanism of action of chloroquine	26
6. Postulated mechanism of action of artemisinin	31
7. Sites of drug action and new drug targets	33
8. Spread of <i>P. falciparum</i> resistance to chloroquine throughout the malaria-endemic regions of the globe.	34
9. Illustrate between percent cure rate of drugs and period of time	37
10. Mapping the CQR determinant in a <i>P.falciparum</i> cross	41
11. Predicted structure of <i>P. falciparum</i> chloroquine resistance transporter. PfCRT	42
12. Mechanistic models of PfCRT-mediated chloroquine resistance	46
13. Predicted structure and genetic polymorphisms in <i>P. falciparum</i> multidrug resistance1.	52
<b>MATERIALS AND METHODS</b>	
14. Schematic representation used of the nested system for the detection of polymorphisms in <i>pfmdr1</i> gene of <i>P. falciparum</i> .	74
<b>RESULTS</b>	
15. Distribution of the number of isolates and 50% inhibitory concentration of CQ	81
16. Box-plot of the CQ IC <sub>50</sub> values of <i>P. falciparum</i> isolates collected during different periods of time.	83

## LIST OF FIGURES (Cont.)

<b>Figure</b>	<b>Page</b>
17. Distribution of the number of isolates and 50% inhibitory concentration of QN	85
18. Box-plot of IC <sub>50</sub> values of QN for <i>P. falciparum</i> isolates collected from different periods of time.	86
19. Distribution of the number of isolates and 50% inhibitory concentration of MQ	88
20. Box-plot of MQ IC <sub>50</sub> values of <i>P. falciparum</i> isolates from different periods of time.	90
21. Distribution of the number of isolates and 50% inhibitory concentration of ARS.	92
22. Box-plot of ARS IC <sub>50</sub> values of <i>P. falciparum</i> isolates from different periods of time.	93
23. The scatter diagram and the regression line representing the relationship between IC <sub>50</sub> (nM) values of CQ and QN	95
24. The scatter diagram and the regression line representing the relationship between IC <sub>50</sub> (nM) values of QN and MQ	96
25. Detection of <i>pfcr</i> t at codon 76	97
26. Detection of <i>pfcr</i> t polymorphism at codon 220	98
27. Detection of <i>pfcr</i> t polymorphism at codon 271	99
28. Detection of <i>pfcr</i> t polymorphism at codon 326	100
29. Detection of <i>pfcr</i> t polymorphism at codon 356	101
30. Detection of <i>pfcr</i> t polymorphism at codon 371	102
31. Detection of <i>pfmdr</i> 1 polymorphism at codon 86	105
32. Detection of <i>pfmdr</i> 1 polymorphism at codon 184	106
33. Detection of <i>pfmdr</i> 1 polymorphism at codon 1034	107
34. Detection of <i>pfmdr</i> 1 polymorphism at codon 1042	108

## LIST OF FIGURES (Cont.)

<b>Figure</b>	<b>Page</b>
35. Detection of <i>pfmdr1</i> polymorphism at codon 1246	109
36. Box-plot of association between time period of parasite isolate selection and the <i>pfmdr1</i> gene copy number.	112
37. Box-plot presented association between multiple point mutation patterns of <i>pfmdr1</i> gene at codon 86, 184, 1034, 1042 and 1246 on the sensitivity of <i>P.falciparum</i> isolates to CQ	130
38. Box-plot presented association between multiple point mutation patterns of <i>pfmdr1</i> gene at codon 86, 184, 1034, 1042 and 1246 on the sensitivity of <i>P.falciparum</i> isolates to QN	131
39. Box-plot presented association between multiple point mutation patterns of <i>pfmdr1</i> gene at codon 86, 184, 1034, 1042 and 1246 on the sensitivity of <i>P.falciparum</i> isolates to MQ	132
40. Box-plot presented association between multiple point mutation patterns of <i>pfmdr1</i> gene at codon 86, 184, 1034, 1042 and 1246 on the sensitivity of <i>P.falciparum</i> isolates to ARS	133
