## ACKNOWLEDGEMENTS

This M.Sc. thesis will never be successful without the valuable helps from these people to whom I would like to express my deepest and sincere gratitude.

I would like to express my sincere gratitude and deep appreciation to my great supervisor, Asst. Prof. Chalernporn Ongvarrasopone for valuable advice, supervision and encouragement throughout this research. She were never lacking in kindness and support.

I am extremely grateful to Prof. Emeritus Sakol Panyim and Assoc. Prof. Apinunt Udomkit for constructive comments, valuable guidance and encouragement in this research.

I feel deeply thank Asst. Prof. Wanchai Assavalapsakul for providing suggestion and acts as the external examiner of the thesis defense.

I would like to thank Assoc. Prof. Varaporn Akkarapatumwong for your kindness in thesis defense and providing suggestions for improvement.

My sincere appreciation is expressed to Dr. Pongsopee Attasart for her kind advice and sharing a valuable experience.

My sincere appreciation is expressed to Ms. Chaweevan Chimawei for providing shrimp sample and instruction of shrimp culture.

I would like to thank Miss Pratsaneeyaporn Porsiri for synthesize double stranded RNAs, stock virus dilution and much useful information.

I also would like to thank all staff in the Institute of Molecular Biosciences for their help and support. Especially special thanks to member of my lab C211 for their friendship and much assistance.

This study was financial supported by grant from National Research Council of Thailand. I also would like to thank Thailand Research Fund, Commission on Higher Education (CHE) and Mahidol University under the National Research University Initiatives.

Finally, I am grateful to express my deepest appreciation and thankfulness to my parents and my family for their entirely care, endless love, support and encouragement throughout my study and my life. They are behind all of my successfulness.

Pipop Saejia
