

**The benefits which may rise from this thesis are dedicated to my parents, entry staff members who took part and to all the research animals**

## ACKNOWLEDGEMENTS

First and for most, I would like to express my deepest gratitude to my research supervisor Assoc. Prof. Dr. Chainarong Navanukraw, for providing me an opportunity to work independently and for his guidance, encouragement, and constructive criticisms throughout the graduate program.

I would like to register my sincere thanks to my committee members, Assoc. Prof. Dr. Suneerat Aiumlami, Dept. of Obstetrics and Gynecology, Faculty of Veterinary Medicine, and Assoc. Prof. Dr. Kanokwan Jarukamjorn, Dept. of Pharmaceutical Chemistry, Faculty of Pharmaceutical Sciences, for their invaluable time spent on in-depth analysis of my research proposal and timely suggestions during the entire course this thesis project.

I would like to acknowledge Prof. Dr. Dale Redmer, Dept. of Animal Sciences, North Dakota State University (NDSU), Fargo, North Dakota, USA for support and the facility during the research in laboratory. I thank Dr. Pawel Borowicz and Mr. Kim Kraft for their help in advanced image analysis.

I am grateful to the graduate students and laboratory technicians at the Dept. of Animal Science, Faculty of Agriculture, Dept. of Anatomy, Faculty of Veterinary Medicine, and Dept. of Pathology, Faculty of Medicine, Khon Kaen University for their help and patience during the study.

My special thanks go to the full financial support from the Office of the Higher Education Commission, Thailand under the program strategic scholarships for frontier research network (CHE-PhD-THA) and the National Research Council of Thailand (NRCT).

I want to acknowledge my appreciation to my parents and my sister (Mrs. Amonrat Khamdee) for their encouragement and support. Lastly, I greatly appreciate the incredible support, understanding, and love of my father (Mr. Bunlu Moonmanee) and my mother (Mrs. Jun Moonmanee). This achievement is also theirs.

Tossapol Moonmanee
