ACKNOWLEDGEMENTS

I would like to express my deep gratitude to many people for the completion of this thesis.

Firstly, I would like to express my very great appreciation to Asst. Prof. Jaruwan Wongthanate who was my major advisor for her guidance and encouragement throughout the development of this thesis. Furthermore, I would like to express my heartfelt gratitude to Assoc. Prof. Benjaphorn Prapagdee and Asst. Prof. Achara Ussawarujikulchai who were my co-advisors and also to Dr. Janjit Iamchaturapatr who was the chair of the Thesis Defense Committee for their helpful suggestions throughout.

I would also like to sincerely thank to the academic and laboratory staff of Faculty of Environment and Resource Studies, Mahidol University for their advice and assistance, staff of central cafeteria of Mahidol University (Salaya campus) and Bureau of Environment and Health, Nonthaburi for their kindness and in their support as regards food waste and seed sludge, respectively.

This thesis is partially supported by Faculty of Environment and Resource Studies of Mahidol University Alumni Association and is supported by a research scholarship funded by the National Research Council of Thailand.

Finally, I would like to special gratitude to my family and friends. They have always supported and encouraged me with their love and best wishes.

Kanda Mongkarothai
