

ACKNOWLEDGMENTS

I would like to express my sincere appreciation to Prof. Dr. Pichet Limsuwan who is my dissertation advisor. Without his support, this work would not have been possible. I also would like to express my gratitude to my dissertation co-advisor, Dr. Krisda Siangchaew, and his excellent guidance and constant encouragement throughout these years has helped me accomplish this work. Dr. Krisda also spends most of his time to review all of the results and my manuscript with valuable data interpretation and recommendation.

I would like to acknowledge the financial support from “Industry/University Cooperative Research Center in Data Storage Technology and Applications, King Mongkut’s Institute of Technology Ladkrabang and National Electronics and Computer Technology Center, National Science and Technology Development Agency” under grant number HDD-06-52-04D.

I also would like to thank Western Digital Thailand Co., Ltd. for all instrument supporting. Without this support, my work would not have been completed.

My final acknowledgement and my sincere appreciation go to my mom and my husband for their constant support and encouragement. Big thank to my new born baby for my inspiration to finish all manuscripts during pregnancy and this thesis book after he was born. Lastly, I would like to pass my sincere appreciation to my passed away dad and wish he can receive the gladness of my success.
