

## ACKNOWLEDGEMENTS

Firstly, I would like to express my sincere thank to my advisor, Prof. Dr. Pichet Limsuwan, for his suggestions, support and help on this dissertation work. I would like to give my sincere thanks to, Dr. Piyapong Asanithi, for his support and knowledgeable guidance during this dissertation. I also appreciate Dr. Sorapong Pavasupree and Dr. Sriwalai Om-apinyan from Rajamangala University of Technology Thanyaburi for their help with X-ray diffractometer and UV-visible spectrophotometer. I would like to thank many people in Applied Nanotechnology Laboratory who have helped me technically and morally through out my Ph.D. engagement. Finally, I would also like to thank my family for all their love and supports.

Major main financial support came from Thailand Center of Excellent in Physics and King Mongkut's University of Technology Thonburi under The National Research University Project.
