

Acknowledgement

We would like to express my gratitude and appreciation to the many people who have contributed to this work. Without them, it would not have been possible.

Gratitude is especially to my parents, who despite of being very far away, have lent me their support and encouragement. I really appreciate their support that I need for being a better person in this world.

Finally, I would like to reveal my special thanks to the Rajamangala University of Technology Rattanakosin for the research fund.
