

<b>Independent Study Title</b>	Development of an Information Technology System for Library Management at the Faculty of Management Science at Rajabhat Institute, Chiang Rai
<b>Author</b>	Ms.Puengpit Kansriwiang
<b>Degree</b>	Master of Science(Information Technology and Management)
<b>Independent Study Advisor</b>	Lecturer Dr.Ekkarat Boonchieng

## ABSTRACT

The purpose of this independent study is to create an Information Technology System for Library Management at the Faculty of Management Science at Rajabhat Institute, Chiang Rai. The creation of the new system aims to achieve greater effectiveness of services. Moreover, the library staff will be able to manage the library more systematically.

An Information Technology System for Library Management at the Faculty of Management Science at Rajabhat Institute, Chiang Rai was created by using Visual Basic 6.0 for programming and using Microsoft SQL Server 2000 for database.

The result of this independent study has shown that this system achieves the effectiveness of service and the library staff can manage the library more systematically. Moreover, this system gives the important information for Administrator to manage and plan the library.
