ACKNOWLEDGEMENTS

I am very thankful to my advisor, Assoc. Prof. Dr. Soontorn Khamyong for his patience, kindness and recommendations on the overall concept of my research. Special thanks are to Dr. Niwat Anongrak, a co-advisor in soil science, who guided me about soil science and corrections of my thesis manuscript, and to Assoc. Prof. Dr. Kriangsak Sri-ngernyuang, a co-advisor in forest ecology, for his helpful comments, suggestions and corrections of the thesis manuscript.

I would like to express my thank to Mrs. Ampai Pornleesangsuwan for her assistance either filed or office works, and also to Mr. Somchai Nongnuang, the head of Intakin Silvicultural Research Station, for providing his staffs to help me during collection of field data, and to Mr. Tapat Seeloy-ounkeaw for soil collection.

This research was received the financial support from the Office of National Research Council of Thailand (NRCT).

Finally, I would like to give respectful thank to my parents for their love, encouragement and patience in looking forward to my success.

Saraj Wattanasuksakul
