

## ACKNOWLEDGEMENT

Firstly, I would like to grateful thank and offer my honest gratitude to my advisor Associate Professor Dr. Samur Thanoi for his advice throughout the study and for his suggestion in my thesis writing.

I would like to grateful thank to my co-advisor Associate Professor Dr. Sutisa Thanoi for her recommendation in my laboratory skills and scientific experiment in this study.

I would like to thank Professor Gavin Reynolds for his suggestion in my thesis writing.

I would like to thank the Naresuan University Fund for financial support.

Moreover, I would like to thank all friends and members of the Neuroscience and Reproductive Biology Research Group for their honest help and support.

Finally, I would like to thank as an expression of gratitude to my father who always beside me and my mother who passed away for their consistency love, understanding, guiding and monetary support. I also thanks to my sister and brother for their love
