

ACKNOWLEDGEMENT

I would like to express my gratitude and appreciation to my advisor, Associate Professor Dr. Kornkanok Ingkaninan for her invaluable advice, guidance, kindness and encouragement throughout the experimental work and the thesis preparation.

The support and suggestion from my co-advisors, Assistant Professor Krongkarn Chootip and Professor Apichart Suksamrarn are appreciated. I also would like to thank committee member: Associate Professor Nantaka Khorana, Assistant Professor Sakonwan Praputbut, Professor Norman Scholfield for their comments and suggestions, Dr. Prapapan Temkitthawon and Miss Kanokwan Changwichit for help in the experimental.

I extremely appreciate and deeply thank to my family for their love, understanding and encouragement throughout my life and I am grateful to members in Bioscreening Unit for suggestions and kindness.

Finally, financial support from Center of Excellence for Innovation in Chemistry (PERCH-CIC) and Faculty of Pharmaceutical Sciences and Laboratory work by the Department of Physiology, Faculty of Medical Sciences, Naresuan University, Phitsanulok, Thailand.

Oraya Khruangthip
