Contents	7
List of Figures	9
Chapter 1 Introduction	11
1.1 Objectives	13
Chapter 2 Literature Reviews	14
2.1 Chlorophyll structure	16
2.2 Chlorophyll derivatives	17
2.3 The chlorophyll degradation pathway	18
2.4 Characterization of Chlorophyll-degrading enzymes in relation to chlorophyll degradation	19
2.5 Postharvest irradiation	24
2.6 Postharvest heat treatment	24
Chapter 3 Materials and Methods	29
3.1 Experiment I Effect of UV-B irradiation on chlorophyll-degrading enzyme activities and postharvest quality in stored lime (<i>Citrus latifolia</i> Tan.) fruit	29
3.2 Experiment II Hot water treatment delays chlorophyll degradation and postharvest quality in lime (<i>Citrus aurantifolia</i> Swingle cv. Paan) fruit	34

	Page
Chapter 4 Results	39
4.1 Experiment I Effect of UV-B irradiation on chlorophyll-degrading enzyme activities and postharvest quality in stored lime (<i>Citrus latifolia</i> Tan.) fruit	39
4.2 Experiment II Hot water treatment delays chlorophyll degradation and postharvest quality in lime (<i>Citrus aurantifolia</i> Swingle cv. Paan)	51
Chapter 5 Discussion	62
5.1 Experiment I Effect of UV-B irradiation on chlorophyll-degrading enzyme activities and postharvest quality in stored lime (<i>Citrus latifolia</i> Tan.) fruit	62
5.2 Experiment II Hot water treatment delays chlorophyll degradation and postharvest quality in lime (<i>Citrus aurantifolia</i> Swingle cv. Paan)	66
Chapter 6 Conclusion	71
References	73
Appendix	82

LIST OF FIGURES

Figure	Page
2.1 Structure formulae	16
2.2 Chlorophyll degradation in higher plants	19
2.3 Pathway of peroxidase-mediated chlorophyll degradation	23
4.1 Changes color of lime fruit fruits treated with UV-B at 0 (Control) and 19.0 kJm ⁻²	40
4.2 Changes in the hue angle value of the peel colour of lime fruits treated with UV-B at 0 (Control) and 19.0 kJm ⁻²	41
4.3 Changes in citric acid (A) and malic acid (B) contents of the juice in lime fruits treated with UV-B at 0 (Control) and 19.0 kJm ⁻²	42 47
4.4 Changes in fructose (A), glucose (B) and sucrose (C) contents of the juice in lime fruits treated with UV-B at 0 (Control) and 19.0 kJm ⁻²	43
4.5 Changes in Chl <i>a</i> (A) and Chl <i>b</i> (B) contents in lime fruits treated with UV-B at 0 (Control) and 19.0 kJm ⁻²	45
4.6 Changes in Chlase (A) and Chl-POX (B) activities in lime fruits treated with UV-B at 0 (Control) and 19.0 kJm ⁻²	47
4.7 Changes in MDS (A) and PPH (B) activities in lime fruits treated with UV-B at 0 (Control) and 19.0 kJm ⁻²	48
4.8 Changes in weight loss in lime fruits treated with or without UV-B at 19.0 kJm ⁻²	49 52

Figure		Page
4.9	Changes in stomatal apertures in lime fruit	50
4.10	Changes in the hue angle value of the peel colour of lime fruits treated with hot water treatment at 0 (Control), 3 and 5 min	52
4.11	Changes in the Chl <i>a</i> (A) Chl <i>b</i> (B) and total Chl (C) contents of lime fruits treated with hot water treatment at 0 (Control), 3 and 5 min	53
4.12	Changes in Chlase (A) and Chl-POX (B) activities of lime fruits treated with hot water treatment at 0 (Control), 3 and 5	55
4.13	Changes in MDS (A) and PPH (B) activities of lime fruits treated with hot water treatment at 0 (Control), 3 and 5 min	56
4.14	Changes in weight loss of lime fruits treated with hot water treatment at 0 (Control), 3 and 5 min	57
4.15	Changes in respiration rate of lime fruits treated with hot water treatment at 0 (Control), 3 and 5 min	58
4.16	Changes in ethylene production of lime fruits treated with hot water treatment at 0 (Control), 3 and 5 min	59
4.17	Changes in titratable acidity of lime fruits treated with hot water treatment at 0 (Control), 3 and 5 min	60
4.18	Changes in total soluble solid of lime fruits treated with hot water treatment at 0 (Control), 3 and 5 min	61
