

Acknowledgements

This work was successfully completed with the assistance of many people. I would like to express to my deepest gratitude to my kind advisor, Associate Professor Dr. Arunporn Itharat for her help, guidance valuable advice, endless kindness, excellent suggestions, encouragement and support for my work. I really appreciate everything she had done for me.

My special thanks also goes to Professor Dr. Somboon Kietinun, Dr. Pintusorn Hansakul, Faculty of Medicine, Thammasat University and Associate Professor Dr. Sukanya Jesadanont, Faculty of Pharmaceutical Sciences, Chulalongkorn University for their English approval and helpful suggestions in the thesis examination.

I also would like to thank Associate Professor Dr. Supinya Tewtrakul and her Ph.D. student, Miss Chutha Sae-Wong, Faculty of Pharmaceutical Sciences, Prince of Songkla University for their kind provision of RAW 264.7 cells, RBL-2H3 cells and help in the anti-inflammatory and anti-allergic study.

Many thanks go to the staffs in Research Unit of Herbs and Food, Faculty of Medicine, Thammasat University, for their help kindness, support and valuable advice. Additionally, I would like to give special thanks to my friends for the help and care that they gave me during my study.

Most importantly, I would like to thank my dear parents, dad and mom, and my younger sister for their love, support, understanding and encouragement throughout my life. I could not have done any of this without them.
