

ACKNOWLEDGEMENT

This study could not be finished if I have not had some valuable comment, advises and support from many people. For this opportunity, I would like to appreciate to all of them.

First at all, I would like to express my profound gratitude to Assoc. Prof Bhanupong Nidhirabha, my advisor and the chairman of the thesis committee, for his valuable advices, guidance and suggestions throughout each stage in the thesis. His knowledge and support was a motivation for me to complete this study in time. I am also grateful to Assoc. Prof Tatre Jantarakolica and Asst. Prof Arunee Punyasavatsut, who are the thesis committee members, for their helpful comments and suggestions in each step of my thesis. Besides that, I would like to appreciate to Dr. Pisut Kulthanavit, who has spent his spare time to read and comment in my draft and the paper for the workshop.

I gratefully acknowledge the Asian Development Bank-Japan government scholarship program for granting a scholarship for my course in Thailand.

I would like to thank all of my friends, who have supported, contributed and shared the data, ideas and suggestions for this study, especially Ms Bui Minh Tam in Thammasat and other friends in Vietnam. And a special appreciation goes to Ms Wannah Vejbrahm and other staffs of the Graduate program/Puey Ungpakorn library for their great support during my course.

The greatest appreciation is to my beloved family; without their encouragement and support, I could not finish my study in time.

Any problem, error or ambiguity is my own responsibility. Any suggestion or comment is welcome.
