

ACKNOWLEDGEMENT

Someone said that preparing the thesis is the long way running. One cannot finish his thesis if he does not work hard and manage his time well. I agree with this idea, but I would like to add more comment on this expression. If we run alone, we might get lost. But, if we have many people help, the goal is reachable. “Thank you very much to everyone who helps me and being part of my success. I am greatly indebted. Thank you”

I am deeply appreciative to Dr. Sittisak Leelahanon, my thesis advisor, who always helped me reviewing my thesis, gives me comments, and helps me solving my thesis problem. I am appreciative for his valuable advice and beneficial discussed time sacrificed throughout the period of thesis preparing. I can say that if I do not have him helps me through out the way, this thesis would not occur.

Moreover, I am beholden to Dr. Chanin Mephokee for his help and suggestion. He always encourages me and being my inspiration to write this thesis. I would say that he is the beginning of this thesis.

I am grateful for Dr. Jakrapong Uchupalanun for his comment and care. Without his comments, I might not stop running in the wrong way and this success will not occur.

I am thankful to Dr. Tanapong Potipiti, who gave me many ideas about this thesis. He gave me a big picture and structure of this thesis. Without his comments, my running path might have more obstacles.

I also wish to express my thankfulness to Kasikorn Bank for providing me the scholarship during the first 2 years. I thank all professors who gave me an idea, who inspire me, and help me during my thesis preparation period. I also thank all officers of Economics Faculty for facilitating and accommodating.

I am indebted to all of my friends and seniors for helping me without any returns. I would like to thank everyone for being my good friends and providing me a warm and comfortable environment.

The most important people I has to thank is my beloved family. With their love, understanding, and support, I can stand and keep running. I am grateful with

deepest of my heart. Thank you. Moreover, I would like say thank you to all people whom I do not mentioned here for their contribution to this thesis.

Finally, any deficiencies and ambiguities in this thesis are my own responsibility.
