

ACKNOWLEDGEMENTS

It became necessary to say that very helpful committee members made this thesis possible with the support from The Global Fund, WHO and National Health Insurance Fund Sudan who agreed to give me the chance to study Health Economics in Chulalongkorn University.

My sincere gratitude to my advisor, Professor Sothitorn Mallikamas for his kind support throughout the period of the study. My gratitude also to my co-advisor, Associate Professor Dr. Sauwakon Ratanawijitrasin for her inspiration, deep and valuable suggestions and her tangible comments.

I am very grateful to Associate Professor Dr. Siripen Supakankunti, Chairperson for her special expertise, valuable and comprehensive comments. I am also most grateful to Margaret Ewen from Health Action International for providing me with computer work files for data analysis, more over his special technical support to cross check data entry to fix all errors.

I am also indebted to NHIF staff with special thanks to Director General Dr. Mustafa and Director of Planning and Research Mr. Bishr for their close monitoring and encouragements and their insistence to get this knowledge. My thanks are also extended to all pharmacists who helped me in data collection, without their co-operation this study could not have been conducted, specifically Mr. Farouq Fysal, Mr. Ismail Aldooma, Mr. Abdu Rabuh, Mr. Alnaw Mr. Mohammed Husain, Mr. Ali and Mr. Mahmoud.

Finally, I owe everlasting gratitude to my family for their help and kindness who sacrificed their times to sit beside me supporting and encouraging me. Also special thanks go to my ever friend Mr. Rafea, who passed away while I was working on this thesis, may his soul rest in peace.
