

## CONTENTS

CHAPTER	TITLE	PAGE
	ABSTRACT	i
	ACKNOWLEDGEMENTS	ii
	CONTENTS	iii
	LIST OF TABLE	iv
	LIST OF FIGURES	v
	LIST OF SYMBOLS AND ABBREVIATIONS	viii
1	INTRODUCTION	
	1.1 Rationale	1
	1.2 Statement of Problem	2
	1.3 Situation of Electricity generation and CO <sub>2</sub> emission in Thailand	2
	1.4 Objective	3
	1.5 Scope of research work	3
	1.6 Literature review	4
2	THEORIES	
	2.1 Economic Foundation	8
	2.2 Computable General Equilibrium Modeling (CGE model)	13
3	METHODOLOGY	
	3.1 Model Setup	21
	3.2 Social Accounting Matrix as Database Input	40
4	RESULTS	
	4.1 Macroeconomic Indicator	49
	4.2 Employment rate	53
	4.3 Electricity Price and Consumption	53
	4.4 CO <sub>2</sub> emissions	55
	4.5 Total production output	56
	4.6 Sectorial Impact	56
	4.7 Flow Diagram	59

**CONTENTS (Cont')**

<b>CHAPTER</b>	<b>TITLE</b>	<b>PAGE</b>
5	CONCLUSION	
	5.1 Discussion and conclusion	60
	5.2 Limitation of the model	61
	5.3 Recommend for further studies	61
	LIST OF REFERENCES	62
	Appendixes	
	Appendix A Carbon Emission Prices	65
	Appendix B Result Data	67

**LIST OF TABLES**

<b>Table</b>	<b>Description</b>	<b>Page</b>
1.1	Electricity generation categorized by type of energy source	3
2.1	Basic SAM structure for CGE model	15
3.1	Activity and commodities in the model and SAM	43
3.2	Macroeconomic data of Thailand	45
3.3	Estimated government expenditure and investment	45
3.4	Result of forecasting long term economic performance of Thailand	46
3.5	Value of exogenous parameters in the dynamic model	46
3.6	CO <sub>2</sub> price in each scenarios	47
3.7	The average CO <sub>2</sub> emissions of power generation in each technology	48

## LIST OF FIGURES

<b>Figure</b>	<b>Description</b>	<b>Page</b>
1.1	Electricity consumption and GDP during year 2004 to 2012.	2
1.2	CO <sub>2</sub> emission generated from electricity activity in Million ton	4
2.1	Consumer utility functions with a budget constraint	9
2.2	Energy price increase effect on budget line while prices of other goods are unchanged	9
2.3	Isoquant lines in different output of production	9
2.4	Isoquant lines with isocost line	10
2.5	Equilibrium point	12
2.6	Impact of electricity price increasing on supply curve	12
2.7	Impact of increasing electricity price on producers' behavior	12
2.8	The circular flow income and expenditure	14
2.9	Technology tree for a nested production functions	17
2.10	Example of electricity supply structure in Pakistan	17
2.11	Household utility functions	18
3.1	Nested Structure of production	22
3.2	A fictitious SAM format in the model (left panel)	41
3.3	A fictitious SAM format in the model (right panel)	42
3.4	Base case's GDP generated by the model	46
4.1	GDP in percentage change from BAU	50
4.2	CPI in percentage change from BAU in various tax scenarios	50
4.3	Consumption budget of households in percentage changes from BAU in various scenarios	51
4.4	Total Government's income in percentage change from BAU	51
4.5	Household savings in percentage changes from BAU	52
4.6	Government savings in percentage change in each scenario	52
4.7	Labor demand changes from BAU in percentage	54
4.8	Electricity price changes from BAU in percentage change	55
4.9	Electricity consumption change in percentage change from BAU	55
4.10	CO <sub>2</sub> emission change in percentage change of BAU	55

**LIST OF FIGURES (Cont')**

<b>Figure</b>	<b>Description</b>	<b>Page</b>
4.11	Total production output in percentage change from BAU	56
4.12	Activity output change in percentage change from BAU (Textile and iron sectors)	57
4.13	Activity output change in percentage change from BAU (Motor and machine sectors)	58
4.14	Flow diagram when implement tax policy on electric generation	59

**LIST OF SYMBOLS AND ABBREVIATIONS**

AT	Average Tax Scenario
BAU	Business As Usual
CCS	Carbon Capture and Storage
CES	Constant Elasticity of Substitution
CET	Constant Elasticity of Transformation
CGE	Computable General Equilibrium
CO <sub>2</sub>	Carbon Dioxide
CPI	Consumer Price Index
EPPO	Energy Police and Planning Office in Thailand
Gwh	Giga watt-hour
GDP	Gross Domestic Product
GHG	Green House Gas
HT	High Tax Scenario
IPCC	Intergovernmental Panel on Climate Change
LT	Low Tax Scenario
NIES	National Institute for Environment Studies
MW	Megawatts
OECD	Organization of Economic Cooperation and Development
