

## ACKNOWLEDGEMENTS

I would like to express my deeply gratitude to all who gave me the possibility to complete this thesis. First, I am particularly grateful for my advisor, Associate professor Dr. Muenduen Phisalaphong for her nice guidance, valuable discussions and suggestion, warm encouragement and valuable supervision during the course of the thesis.

Moreover, I also grateful for the members of thesis examination committee, Associate Professor Bunjerd Jongsomjit, Chutimon Satirapipathkul, Assistant Professor Sorada Kanokpanont, and Dr. Jeerun Kingkaew, who gave helpful suggestions and information for this thesis. I would like to thank the Integrated Innovation Academic Center : IIAC Chulalongkorn University Centenary Academic Development (Project Code: CU56-AM01) and partially supported by the Higher Education Research Promotion and National Research University Project of Thailand, Office of the Higher Education Commission (Project Code: AM667A). Finally, I would like to dedicate this thesis to my parents and my families for their always support and encouragement as well as my friends in the Department of Chemical Engineering, Chulalongkorn University.
