

ACKNOWLEDGEMENTS

I would like to express my gratitude, Assistant Professor Dr. Khanitha Pudhom, Department of Chemistry, Faculty of Science, Chulalongkorn University, for contributing a great deal to my research.

Moreover I would to thank the Chairperson: Assistant Professor Dr. Warinthorn Chavasiri, Department of Chemistry, Faculty of Science, Chulalongkorn University; the thesis examiners: Assistant Professor Dr. Pattara Sawasdee, Department of Chemistry, Faculty of Science, Chulalongkorn University and Dr. Damrong Sommit, Mahanakorn University of Technology, for their invaluable discussion and suggestion.

I wish to thank The 90th Anniversary of Chulalongkorn University Fund (Ratchadaphiseksomphot Endowment Fund) for granting in partial financial support to conduct this research.

Special thanks to the member of laboratory (1532) for their help and kind friendship.

Finally, I am deeply grateful to my family for their love and encouragement throughout my M.Sc. study.
