<b>ABSTRACT (THAI)</b> .....	iv
<b>ABSTRACT (ENGLISH)</b> .....	v
<b>ACKNOWLEDGEMENTS</b> .....	vi
<b>CONTENTS</b> .....	vii
<b>LIST OF TABLES</b> .....	x
<b>LIST OF FIGURES</b> .....	xii
<b>LIST OF ABBREVIATIONS</b> .....	xviii
<b>CHAPTER</b>	
<b>I INTRODUCTION</b> .....	1
Background and Significance of the Study .....	1
Objectives of the Study .....	4
Expected benefits .....	4
Scope of the study .....	5
<b>II LITERATURE REVIEWS</b> .....	6
Quality control of herbal drugs .....	6
Safety and efficacy regulation .....	10
Ben-Cha-Moon-Yai remedy .....	12
<i>Aegle marmelos</i> (L.) Correa ex Roxb.(Rutuceae) .....	13
<i>Dimocarpus longan</i> Lour. (Sapindaceae) .....	16
<i>Dolichandrone serrulata</i> (DC.) Seem (Bignoniaceae) .....	20
<i>Oroxylum indicum</i> (L.) Kurz (Bignoniaceae) .....	22
<i>Walsura trichostemon</i> Miq. (Meliaceae) .....	27
<b>III MATERIALS AND METHODS</b> .....	29
Materials and chemicals .....	29
Crude extract preparation .....	32
Pharmacognostic specifications .....	33

**CHAPTER**

Cytotoxic activity using Brine shrimp lethality testing.....	37
Mutagenic activity using Ames test.....	38
DNA damage using Comet assay.....	40
Anti-mutagenic activity using Ames test.....	42
Anti-microbial activity.....	43
Free radical scavenging activity using DPPH assay.....	46
Lipid peroxidation testing using $\beta$ -carotene bleaching assay.....	47
Nitric oxide scavenging activity using Griess reagent assay.....	48
Total phenolic contents using Folin-Ciocalteu reagent.....	49
Anti-pyretic activity using LPS-induced fever in rats.....	49
Anti-inflammatory and anti-nociceptive activities.....	52
Carrageenan-induced paw edema in mice.....	54
Hot plate test.....	56
Formalin test.....	58
Acetic acid-induced writhing test.....	60
Rota-rod test.....	61
<b>IV RESULTS</b> .....	63
Pharmacognostic specifications.....	63
<i>Aegle marmelos</i> (L.) Correa ex Roxb.(Rutaceae).....	65
<i>Dimocarpus longan</i> Lour. (Sapindaceae).....	75
<i>Dolichandrone serrulata</i> (DC.) Seem (Bignoniaceae).....	86
<i>Oroxylum indicum</i> (L.) Kurz (Bignoniaceae).....	96
<i>Walsura trichostemon</i> Miq. (Meliaceae).....	106
Ben-Cha-Moon-Yai remedy.....	119
Plant extraction.....	122

## LIST OF TABLES

Table		Page
1	Component of Ben-Cha-Moon-Yai remedy.....	12
2	Chemical constituents from various parts of <i>A. marmelos</i> .....	13
3	Chemical constituents from various parts of <i>D. longan</i> .....	16
4	Chemical constituents from various parts of <i>D. serrulata</i> .....	20
5	Chemical constituents from various parts of <i>O. indicum</i> .....	22
6	Chemical constituents from various parts of <i>W. trichostemon</i> .....	27
7	The tested microorganisms .....	44
8	Physico-chemical specification (% by weight) of <i>A. marmelos</i> .....	70
9	LC-ESI-MS data and identification of constituents from the root of <i>A. marmelos</i> .....	74
10	Physico-chemical specification (% by weight) of <i>D. longan</i> .....	81
11	LC-ESI-MS data and identification of constituents from the root of <i>D. longan</i> .....	85
12	Physico-chemical specification (% by weight) of <i>D. serrulata</i> .....	91
13	LC-ESI-MS data and identification of constituents from the root of <i>D. serrulata</i> .....	95
14	Physico-chemical specification (% by weight) of <i>O. indicum</i> .....	101
15	LC-ESI-MS data and identification of constituents from the root of <i>O. indicum</i> .....	105
16	Physico-chemical specification (% by weight) of <i>W. trichostemon</i> .....	111
17	LC-ESI-MS data and identification of constituents from the root of <i>W. trichostemon</i> .....	115
18	LC-ESI-MS data and identification of constituents from the root of Ben-Cha-Moon-Yai remedy .....	121

<b>Table</b>	<b>Page</b>
19 Crude extracts of five root species in Ben-Cha-Moon-Yai remedy.....	122
20 Brine shrimp lethality (LC <sub>50</sub> ) of the extracts from Ben-Cha-Moon-Yai remedy and its ingredient.....	123
21 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Staphylococcus aureus</i> .....	140
22 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Staphylococcus epidermidis</i> .....	141
23 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Bacillus cereus</i> .....	142
24 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Bacillus subtilis</i> .....	143
25 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Micrococcus luteus</i> .....	144
26 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Enterobacter aerogenes</i> .....	145
27 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Escherichia coli</i> .....	146
28 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Pseudomonas aeruginosa</i> .....	147
29 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Salmonella typhi</i> .....	148
30 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Salmonella typhimurium</i> .....	149
31 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Shigella sp.</i> .....	150
32 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Candida albicans</i> .....	151
33 The antimicrobial activities of Ben-Cha-Moon-Yai remedy and five root species extracts at 4 mg/ml against <i>Saccharomyces cerevisiae</i> .....	152

<b>Table</b>	<b>Page</b>
34 Inhibition concentration of DPPH scavenging activity (IC <sub>50</sub> ) of the extracts from Ben-Cha-Moon-Yai remedy and its ingredient.....	153
35 Inhibition concentration of nitric oxide scavenging activity (IC <sub>50</sub> ) of the extracts from Ben-Cha-Moon-Yai remedy and its ingredient.....	156
36 Total phenolic content from the water extract of five root species in Ben-Cha-Moon-Yai remedy at 500 mg/ml.....	157
37 Change of edema volume (ml) or oral administration of 2% Tween, indomethacin and Ben-Cha-Moon-Yai remedy.....	170
38 Change of edema volume (ml) or oral administration of 2% Tween, indomethacin and <i>A. marmelos</i> root extract.....	171
39 Change of edema volume (ml) or oral administration of 2% Tween, indomethacin and <i>D. longan</i> root extract.....	172
40 Change of edema volume (ml) or oral administration of 2% Tween, indomethacin and <i>D. serrulata</i> root extract.....	173
41 Change of edema volume (ml) or oral administration of 2% Tween, indomethacin and <i>O. indicum</i> root extract.....	174
42 Change of edema volume (ml) or oral administration of 2% Tween, indomethacin and <i>W. trichostemon</i> root extract.....	175
43 Time spent on paw licking after intraperitoneal administration of 0.9% normal saline solution and morphine sulfate.	199
44 Time spent on paw licking after intraperitoneal administration of 0.9% normal saline solution, indomethacin and Ben-Cha-Moon-Yai remedy extract .....	199
45 Time spent on paw licking after intraperitoneal administration of 0.9% normal saline solution, indomethacin and <i>A. marmelos</i> extract .....	200
46 Time spent on paw licking after intraperitoneal administration of 0.9% normal saline solution, indomethacin and <i>O. indicum</i> extract.....	201
47 Time spent on paw licking after intraperitoneal administration of 0.9% normal saline solution, indomethacin and <i>D. longan</i> extract.....	202

<b>Table</b>	<b>Page</b>
48 Time spent on paw licking after intraperitoneal administration of 0.9% normal saline solution, indomethacin and <i>D. serrulata</i> extract.....	203
49 Time spent on paw licking after intraperitoneal administration of 0.9% normal saline solution, indomethacin and <i>W. trichostemon</i> extract.....	204
50 Conclusion of safety and efficacy of five root species and Ben-Cha-Moon-Yai remedy.....	236
51 Pharmacognostic characters (% by weight) of <i>Aegle marmelos</i> root .....	269
52 Pharmacognostic characters (% by weight) of <i>Dimocarpus longan</i> root.....	272
53 Pharmacognostic characters (% by weight) of <i>Dolichandrone serrulata</i> root.....	275
54 Pharmacognostic characters (% by weight) of <i>Oroxylum indicum</i> root....	278
55 Pharmacognostic characters (% by weight) of <i>Walsura trichostemon</i> root.....	281
56 Mutagenicity of Ben-Cha-Moon-Yai remedy and its ingredients (200 mg/ml) in acid solution pH 3.0-3.5 on <i>S. typhimurium</i> TA98.....	309
57 Mutagenicity of Ben-Cha-Moon-Yai remedy and its ingredients (200 mg/ml) in acid solution pH 3.0-3.5 on <i>S. typhimurium</i> TA100.....	311

## LIST OF FIGURES

Figure		Page
1	Scope of the study.....	5
2	Quality control methods for medicinal plant materials .....	9
3	<i>Aegle marmelos</i> (L.) Correa ex Roxb.(Rutuceae).....	15
4	<i>Dimocarpus longan</i> Lour. (Sapindaceae).....	19
5	<i>Dolichandrone serrulata</i> (DC.) Seem (Bignoniaceae).....	21
6	<i>Oroxylum indicum</i> (L.) Kurz (Bignoniaceae).....	26
7	<i>Walsura trichostemon</i> Miq. (Meliaceae).....	28
8	Digital Thermometer.....	52
9	Plethysmometer.....	55
10	Hot-Plate Analgesiometer.....	58
11	Formalin-induced paw licking in mouse.....	59
12	Writhing response in mouse.....	61
13	Rota-rod test in mice.....	62
14	The flowering branch of <i>A. marmelos</i> .....	66
15	Transverse section of <i>A. marmelos</i> root.....	67
16	Powder of <i>A. marmelos</i> root.....	68
17	The root of <i>A. marmelos</i> .....	69
18	Thin –layer chromatogram of the methanol extract of <i>A. marmelos</i> root.....	71
19	The 3D-HPLC profiles of ethanol extract of <i>A. marmelos</i> root.....	72
20	A representative LC/MS chromatogram from <i>A. marmelos</i> root.....	73
21	The fruiting branch of <i>D. longan</i> .....	77
22	Transverse section of <i>D. longan</i> root.....	78
23	Powder of <i>D. longan</i> root.....	79
24	The root of <i>D. longan</i> .....	80

<b>Figure</b>	<b>Page</b>
25 Thin –layer chromatogram of the methanol extract of <i>D. longan</i> root.....	82
26 The 3D-HPLC profiles of ethanol extract of <i>D. longan</i> root.....	83
27 A representative LC/MS chromatogram from <i>D. longan</i> root.....	84
28 The flowering branch of <i>D. serrulata</i> .....	87
29 Transverse section of <i>D. serrulata</i> root.....	88
30 Powder of <i>D. serrulata</i> root.....	89
31 The root of <i>D. serrulata</i> .....	90
32 Thin –layer chromatogram of the methanol extract of <i>D. serrulata</i> root.....	92
33 The 3D-HPLC profiles of ethanol extract of <i>D. serrulata</i> root.....	93
34 A representative LC/MS chromatogram from <i>D. serrulata</i> root.....	94
35 The flowering branch of <i>O. indicum</i> .....	97
36 Transverse section of <i>O. indicum</i> root.....	98
37 Powder of <i>O. indicum</i> root.....	99
38 The root of <i>O. indicum</i> .....	100
39 Thin –layer chromatogram of the methanol extract of <i>O. indicum</i> root.....	102
40 The 3D-HPLC profiles of ethanol extract of <i>O. indicum</i> root.....	103
41 A representative LC/MS chromatogram from <i>O. indicum</i> root.....	104
42 The flowering branch of <i>W. trichostemon</i> .....	107
43 Transverse section of <i>W. trichostemon</i> root.....	108
44 Powder of <i>W. trichostemon</i> root.....	109
45 The root of <i>W. trichostemon</i> .....	110
46 Thin-layer chromatogram of the methanol extract of <i>W. trichostemon</i> root.....	112
47 The 3D-HPLC profiles of ethanol extract of <i>W. trichostemon</i> root.....	113
48 A representative LC/MS chromatogram from <i>W. trichostemon</i> root.....	114

<b>Figure</b>		<b>Page</b>
49	The 3D-HPLC profiles of ethanol extract of Ben-Cha-Moon-Yai remedy...	119
50	A representative LC/MS chromatogram from Ben-Cha-Moon-Yai remedy root.....	120
51	The mutagenic index induced by the ethanol and water extracts from each plant species without nitrite treated on <i>S. typhimurium</i> TA98.....	125
52	The mutagenic index induced by the ethanol and water extracts from each plant species without nitrite treated on <i>S. typhimurium</i> TA100.....	126
53	The mutagenic index induced by the ethanol and water extracts from each plant species with nitrite treated on <i>S. typhimurium</i> TA98.....	127
54	The mutagenic index induced by the ethanol and water extracts from each plant species with nitrite treated on <i>S. typhimurium</i> TA100.....	128
55	The mutagenic index induced by Ben-Cha-Moon-Yai remedy with and without nitrite treated on <i>S. typhimurium</i> TA98.....	129
56	Image of comets from human lymphocytes stained with DAPI with 5 classes of DNA damage used for visual scoring.....	130
57	The total summing values of the number of comet classification with obtained from the ethanol and water extracts of five root species and Ben-Cha-Moon-Yai remedy.....	131
58	The DNA damage in lymphocytes treated with different concentrations of Ben-Cha-Moon-Yai remedy and five root species or control.....	132
59	Inhibitory effect of Ben-Cha-Moon-Yai remedy and its components extracts on the mutagenicity of sodium nitrite-treated 1-aminopyrene on <i>S. typhimurium</i> strains TA98 and TA100.....	138
60	Changes of the absorbance at 450 nm with time for the ethanol and water extracts in $\beta$ -carotene bleaching assay.....	154
61	Changes in rectal temperature after oral administration of 2% Tween80, ASA.....	161

<b>Figure</b>	<b>Page</b>
62	Changes in rectal temperature after oral administration of 2% Tween80, ASA and Ben-Cha-Moon-Yai remedy..... 162
63	Changes in rectal temperature after oral administration of 2% Tween80, ASA and <i>A. marmelos</i> ..... 163
64	Changes in rectal temperature after oral administration of 2% Tween80, ASA and <i>D. serrulata</i> ..... 164
65	Changes in rectal temperature after oral administration of 2% Tween80, ASA and <i>D. longan</i> ..... 165
66	Changes in rectal temperature after oral administration of 2% Tween80, ASA and <i>O. indicum</i> ..... 166
67	Changes in rectal temperature after oral administration of 2% Tween80, ASA and <i>W. trichostemon</i> ..... 167
68	Area of analgesia from 0-240 min after intraperitoneal administration of NSS and morphine sulphate..... 178
69	Area of analgesia from 0-240 min after intraperitoneal administration of 2% Tween80 and Ben-Cha-Moon-Yai remedy..... 179
70	Area of analgesia from 0-240 min after intraperitoneal administration of 2% Tween80 and <i>A. marmelos</i> ..... 180
71	Area of analgesia from 0-240 min after intraperitoneal administration of 2% Tween80 and <i>D. longan</i> ..... 181
72	Area of analgesia from 0-240 min after intraperitoneal administration of 2% Tween80 and <i>D. serrulata</i> ..... 182
73	Area of analgesia from 0-240 min after intraperitoneal administration of 2% Tween80 and <i>O. indicum</i> ..... 183
74	Area of analgesia from 0-240 min after intraperitoneal administration of 2% Tween80 and <i>W. trichostemon</i> ..... 184
75	Area of analgesia from 0-240 min after intraperitoneal administration of 2% Tween80, <i>A. marmelos</i> , naloxone and <i>A. marmelos</i> with naloxone..... 185

<b>Figure</b>		<b>Page</b>
76	Area of analgesia from 0-240 min after intraperitoneal administration of 2% Tween80, <i>D. serrulata</i> , naloxone and <i>D. serrulata</i> with naloxone.....	186
77	Area of analgesia from 0-240 min after intraperitoneal administration of 2% Tween80, <i>W. trichostemon</i> , naloxone and <i>W. trichostemon</i> with naloxone.....	187
78	Time spent on paw licking after intraperitoneal administration of 0.9% NSS and morphine sulphate.....	192
79	Time spent on paw licking after intraperitoneal administration of 0.9% 2% Tween80, indomethacin, and Ben-Cha-Moon-Yai remedy.....	193
80	Time spent on paw licking after intraperitoneal administration of 0.9% 2% Tween80, indomethacin, and <i>A. marmelos</i> .....	194
81	Time spent on paw licking after intraperitoneal administration of 0.9% 2% Tween80, indomethacin, and <i>O. indicum</i> .....	195
82	Time spent on paw licking after intraperitoneal administration of 0.9% 2% Tween80, indomethacin, and <i>D. longan</i> .....	196
83	Time spent on paw licking after intraperitoneal administration of 0.9% 2% Tween80, indomethacin, and <i>D. serrulata</i> .....	197
84	Time spent on paw licking after intraperitoneal administration of 0.9% 2% Tween80, indomethacin, and <i>W. trichostemon</i> .....	198
85	Mean number of writhes after oral administration of 2% Tween, indomethacin and Ben-Cha-Moon-Yai remedy.....	207
86	Mean number of writhes after oral administration of 2% Tween, indomethacin and <i>A. marmelos</i> .....	208
87	Mean number of writhes after oral administration of 2% Tween, indomethacin and <i>O. indicum</i> .....	209
88	Mean number of writhes after oral administration of 2% Tween, indomethacin and <i>D. longan</i> .....	210
89	Mean number of writhes after oral administration of 2% Tween, indomethacin and <i>D. serrulata</i> .....	211

<b>Figure</b>		<b>Page</b>
90	Mean number of writhes after oral administration of 2% Tween, indomethacin and <i>D. serrulata</i> .....	212
91	Rota-rod latency of each extract after oral administration compared to 2% Tween 80 (10 ml/kg).....	214
92	A representative LC/MS spectrums from <i>A. marmelos</i> root.....	285
93	A representative LC/MS spectrums from <i>D. longan</i> root.....	287
94	A representative LC/MS spectrums from <i>D. serrulata</i> root.....	289
95	A representative LC/MS spectrums from <i>O. indicum</i> root.....	291
96	A representative LC/MS spectrums from <i>W. trichostemon</i> root.....	295
97	A representative LC/MS spectrums from Ben-Cha-Moon-Yai remedy root.....	306
