

ACKNOWLEDGEMENTS

First, I would like to express my sincere thanks to my thesis advisor, Dr. Pipat Chaiwiwatworakul for his invaluable help and encouragement throughout the course of this research. I am most grateful for his teaching and suggestions on how to cope with not only my thesis but life as well. Thanks Prof. Dr. Surapong Chiraratananon for experimental support.

Furthermore, I would like to thank the Joint Graduate School of Energy and Environment for giving me the chance to study here and for the financial support.

Finally, I would not have achieved all these things without encouraging and helping from my parents, friends and seniors. Thanks to all you guys.
