Abstract

The aims of this research are 1) to create a storage system for quality assurance of the Faculty of Engineering, King Mongkut's University of Technology Thonburi. 2) to measure the quality of this storage system (for quality assurance of the Faculty of Engineering, King Mongkut's University of Technology Thonburi) and 3 to assess the satisfaction of the executives, instructors and staffs on the storage system (for quality assurance of the Faculty of Engineering, King Mongkut's University of Technology Thonburi.) The sample is a group of executives, instructors and staffs responsible for quality assurance in Faculty of Engineering, King Mongkut's University of Technology Thonburi of 40 people. An instrument used in this research is a storage system for quality assurance and quality assessment. An evaluation by experts in data storage systems has an average of 4.16 with standard deviation 0.28 average. The quality of the system is in the good. There evaluated by experts in quality assurance. The mean is equal to 4.30 average and standard deviation is 0.20 quality of education is in the good level. Assessment of satisfaction with the storage system for quality assurance of the Faculty of Engineering, King Mongkut's University of Technology Thonburi. Yields the average of 4.03 with average standard deviation of 0.06 which indicates that the sample is very satisfied with the system.
