<b>Independent Study Advisor</b>	Lecturer Dr. Samerkae Somhom

## **ABSTRACT**

This independent study is called” Development of an Information System for Production Management at Lampang Packing Company Limited” There are two main purposed of the study. First, the study intends to create a database system for the raw materials, all kind of papers. The second purpose is to develop a particular system which helps organize various and complicated customers' oder.

This stydy uses System Development Life Cycle (SDLC) in researching and developing the database and the datasystem. All developing processes are operated on Window XP by using the computer language called”Microsoft Access” and “Microsoft Visio 2002” for drawing the Boxes. The program can created database of raw materials and also makes the report for CEO that can know about the movement of raw materials and order.

After the prototype from the study is implemented the prototype can reduce the lead time Moreover, all details from customer’s order are organized in the format which facilitate decision making process.
