ACKNOWLEDGEMENT	iii
ABSTRACT (in Thai)	v
ABSTRACT (in English)	viii
TABLE OF CONTENTS	xi
LIST OF TABLES	xiii
LIST OF FIGURES	xiv
CHAPTER 1 INTRODUCTION	1
1.1 Pre-cretaceous volcanic rocks in Thailand	1
1.2 Scope of study	7
1.3 Location and accessibility	7
1.4 Topography and Physiography	8
CHAPTER 2 GEOLOGICAL SETTING	12
2.1 Silurian Igneous Rocks	12
2.2 Carboniferous-Devonian Metamorphic Rocks	15
2.3 Carboniferous Sedimentary Rocks	15
2.4 Permian-Carboniferous Sedimentary Rocks	15
2.5 Triassic-Permian Igneous Rocks	16
2.6 Triassic Sedimentary and Igneous Rocks	16
2.7 Recent Sediment Deposits	17
CHAPTER 3 OCCURRENCE, LITHOLOGY AND PETROGRAPHY	18
3.1 Group I Rocks	18
3.1.1 Occurrence	18
3.1.2 Lithology and Petrography	21
3.2 Group II Rocks	35

3.2.1 Occurrence	35
3.2.2 Lithology and Petrography	38
CHAPTER 4 GEOCHEMISTRY	52
4.1 Sample Preparation	52
4.2 Analytical techniques	53
4.3 Element Mobility	54
4.4 Magmatic Affinities of Mafic Igneous Rocks	63
4.5 Tectonic Setting of Eruption	70
CHAPTER 5 CONCLUSIONS	82
5.1 Chiang Rai-Chiang Mai Volcanic belt	82
5.2 Tectonic Implications	86
REFERENCES	88
APPENDIX	97
CURRICULUM VITAE	131

LIST OF TABLES

Table		Page
4.1	Whole-rock analyses and some selected ratios of the studied least-altered mafic igneous rocks	55
4.2	REE, Hf and Ta analyses (ppm), and some selected chondrite-normalized ratios of the studied least-altered mafic igneous rocks	62

LIST OF FIGURES

Figure	Page
1.1 Distribution of Pre-Cretaceous mafic volcanic rocks in Thailand	2
1.2 Map of Chiang Rai Province of Thailand showing accessibility to the study areas	9
1.3 Topographic map showing the study area of Mae Sai area and the locations of collected mafic igneous rocks	10
1.4 Topographic map showing the study area of Mae Chan area and the locations of collected mafic igneous rocks	11
2.1 Simplified geologic map of Mai Sai area and location of collected samples	13
2.2 Simplified geologic map of Mai Chan area and location of collected samples	14
3.1 The outcrop of Group I Microdiorite at grid reference 849435	19
3.2 The outcrop of Group I Microdiorite at grid reference 854463	19
3.3 The float rocks of Group I Diorite at grid reference 846425	20
3.4 The float rocks of Group I Diorite at grid reference 845473	20
3.5 Gabbro/diorite breccias of Group I rocks injected by felsic plutonic rock at grid reference 885513	22
3.6 The outcrop of the Permian gray-limestones at grid reference 909546	22
3.7 Photomicrographs of Group I Gabbro (sample number MS10B4) showing amphibole (amp) and plagioclase (plag)	23
3.8 Photomicrographs of Group I Diorite (sample number MS5B6(13)) showing amphibole (amp), plagioclase (plag) and titanite (ti)	25
3.9 Photomicrographs of Group I Monzodiorite (sample number MS6.3B5(D)) showing amphibole (amp), plagioclase (plag), quartz (qtz) and interstitial intergrowths	27

3.10	Photomicrographs of Group I Microgabbro (sample number MS12B3) showing amphibole (amp), plagioclase (plag) and opaque mineral (opq)	29
3.11	Photomicrographs of Group I Microgabbro (sample number MS16B1) showing kink-band feature of amphibole (amp)	31
3.12	Photomicrographs of Group I Microdiorite (sample number MS65B5) showing amphibole (amp), plage (plagioclase) and ti (titanite)	32
3.13	Photomicrographs of Group I Andesite/Basalt (sample number MC6.3B5(B)) showing amphibole (amp), plagioclase laths (plag) and ophitic/subophitic intergrowths	34
3.14	The outcrop of Group II Diorite at grid reference 922251	36
3.15	The outcrop of Group II Gabbro at grid reference 999275	36
3.16	The float rocks of Group II Microdiorite/Microgabbro at grid reference 008350	37
3.17	The yellow-reddish brown weathering surface and float rocks of Group II Gabbro at grid reference 939151	37
3.18	Photomicrographs of Group II Gabbro (sample number MC18B2) showing clinopyroxene (cpx), plagioclase (plag)	39
3.19	Photomicrographs of Group II Diorite (sample number MC39B3) showing green amphibole (amp), opaque mineral (opq) and plagioclase (plag)	42
3.20	Photomicrographs of Group II Microgabbro (sample number MC25B5) showing clinopyroxene (cpx), plagioclase (plag), and intergranular texture	44
3.21	Photomicrographs of Group II Microdiorite/Microgabbro (sample number MC17.2B2) showing plagioclase (plag) and exsolution structure of clinopyroxene (cpx)	46
3.22	Photomicrographs of Group II Andesite/Basalt (sample number MC40B3) showing green amphibole (amp), plagioclase laths (plag), and intergranular texture	48

3.23	Photomicrographs of Group II Basalt (sample number MC69.1B61) showing clinopyroxene (cpx), plagioclase (plag) and ophitic/subophitic intergrowths	50
4.1	Plot of Zr/TiO_2 against Nb/Y for the studied, least-altered mafic igneous rocks	64
4.2	Chondrodite-normalized patterns for the representatives of Group I and Group II mafic igneous rocks	66
4.3	N-MORB normalized multi-element patterns for the representatives of (a) Group I and (b) Group II mafic igneous rocks	67
4.4	Zirconia variation diagrams for CaO, TiO_2 , SiO_2 , Na_2O , P_2O_5 , FeO^* , K_2O and MgO for the studied, least-altered mafic igneous rocks	68
4.5	Zirconia variation diagrams for Ni, V, Cr, Nb, Y, Rb, Sr, Ba and Sr for the studied, least-altered mafic igneous rocks	69
4.6	Ti/Y-Nb/Y discrimination diagram (after Pearce, 1982) for the studied, least-altered mafic igneous rocks	71
4.7	Ti-V tectonic discrimination diagram (after Shervais, 1982) for the studied, least-altered mafic igneous rocks	71
4.8	Zr/Y-Ti/Y discrimination diagram between plate-margin basalt and within-plate basalt (after Pearce and Gale, 1977) for the studied, least-altered mafic igneous rocks	72
4.9	Zr/Y-Zr discrimination diagram (after Pearce and Norry, 1979) for the studied, least-altered mafic igneous rocks	72
4.10	Cr-Y discrimination diagram (after Pearce, 1982) for the studied, least-altered mafic igneous rocks	73
4.11	Nb/Y-Zr/ P_2O_5 discrimination diagram (adapted from Floyd and Winchester, 1975) for the studied, least-altered mafic igneous rocks	73
4.12	Ti-Zr discrimination diagram for the studied, least-altered mafic igneous rocks (a) after Pearce (1982) and (b) after Pearce and Can (1973)	74

4.13	TiO ₂ -Y/Nb discrimination diagram (from Floyd and Winchester, 1975) for the studied, least-altered mafic igneous rocks	75
4.14	The Zr-Nb-Y discrimination diagram for the studied, least-altered mafic igneous rocks (after Meschede, 1986)	75
4.15	The Zr-Ti-Y discrimination diagram for the studied, least-altered mafic igneous rocks (after Pearce and Cann, 1973)	76
4.16	The Th-Hf-Ta discrimination diagram (after Wood, 1980) for the studied, least-altered mafic igneous rocks	76
4.17	The La-Y-Nb discrimination diagram (after Cabanis and Lecolle, 1989) for the studied, least-altered mafic igneous rocks	77
4.18	Chondrite-normalized REE patterns and N-MORB normalized multi-element patterns for the studied, least-altered mafic igneous rocks of Group I and their modern analogue	79
4.19	Chondrite-normalized REE patterns and N-MORB normalized multi-element patterns for the studied, least-altered mafic igneous rocks of Group II and their modern analogue	80
5.1	Schematic diagrams showing tectonic evolution of Shan-Thai and Indochina terranes	87
