### Abstract

This study aimed to examine the satisfaction concerning educational opportunity expansion schools administration under the Office of Lamphun Provincial Primary Education. The sample of the study comprised 109 non-school committee member teachers, 141 school committee members, and 259 mathayom-suksa 3 students. The instrument used in collecting data was a rating scale questionnaire. Percentage, mean, and standard deviation were applied to analyze the data.

Findings were as follows:

Non school committee member teachers were satisfied at a high level with these school affairs administration : clerical and finance matters, student affairs, community relations, and school buildings respectively. But they were moderately satisfied with personnel and academic affairs administration.

Schools committee members were satisfied with all school affairs administration at a high level. But these aspects satisfied mathayom-suksa 3 students at a moderate level except school buildings administration that satisfied them at a high level.
