LIST OF FIGURES	xxi
<b>CHAPTER</b>	
<b>1. INTRODUCTION</b>	<b>1</b>
1.1 Research Background	1
1.2 Objectives of the Research	1
1.3 Scopes of Study	4
1.4 Expected Benefits	5
<b>2. LITERATURE REVIEW</b>	<b>6</b>
2.1 Broccoli	6
2.2 Fresh-Cut Produce	7
2.2.1 Production of Fresh-Cut Produce	9
2.2.2 Microbial Contamination of Fresh-Cut Produce	11
2.2.2.1 Common Microbial Quality	12
2.2.2.2 Type of Spoilage Microorganisms	13
2.2.2.3 Type of Food-Borne Pathogen	15
2.2.3 Thai Agricultural Commodity and Food Standard	17
2.2.4 Physiological and Biochemical of Fresh-Cut Produce	20
2.2.4.1 Respiration and Ethylene Production	21
2.2.5 Plant Responses to Stresses	22
2.2.5.1 Hydrogen Peroxide	22

	<b>PAGE</b>
2.2.5.2 Non-Enzymatic Antioxidant Scavenging Systems in Fruits and Vegetables	24
A) Ascorbic acid	24
B) Chlorophyll	25
C) Carotenoids	27
D) Phenolic compounds	27
E) Glucosinolate compounds	29
2.2.5.3 Enzymatic Antioxidant Scavenging Systems in Fruits and Vegetables	32
A) Catalase	32
B) Peroxidase	33
C) Superoxide Dismutase	34
D) Ascorbate Peroxidase	35
E) Hydrogen Peroxide	36
F) Glutathione Reductase	36
2.3 Treatments to Extend Shelf-Life and Enhance Safety of Fresh-Cut Produces	37
2.3.1 Heat Treatment	37
2.3.2 Ozone Treatment	37
2.3.3 Sodium Chlorite Solutions	39
2.4 Storage and Fresh-Cut Processing	45
<b>3. MATERIALS AND METHODS</b>	<b>46</b>
3.1 Research Background	46
3.2 Experimental Designs	46
3.2.1 Experiment I: Study on the Effects of Sanitary Treatments on Microbial Growth and Visual Quality in Fresh-Cut Broccoli Florets during Storage	46
3.2.2 Experiment II: Study on the Effects of Hot Water Combined with Sodium Chlorite on Microbial Growth and Visual Quality in Fresh-cut Broccoli Florets during Storage	48

	<b>PAGE</b>
3.2.3 Experiment III: Study on the Effects of Hot Water Combined with Sodium Chlorite on the Change of Bioactive Compounds in Fresh-cut Broccoli Florets during Storage	49
3.2.4 Experiment IV: Study on the Effects of Hot Water Combined with Sodium Chlorite on the Change of Antioxidant Activities in Fresh-cut Broccoli Florets during Storage	50
3.3 Analytical Parameters	51
3.3.1 Microbial Analysis	51
3.3.2 The Florets Color	51
3.3.3 Internal Gas Analysis	51
3.3.4 Respiration Rate	51
3.3.5 Sensory Evaluation (9-Point Hedonic Scale)	52
3.3.6 Determination of Ascorbic Acid and Dehydroascorbic Acid Content	52
3.3.7 Determination of Chlorophyll and Carotenoid Content	53
3.3.8 Methanolic Extraction	53
3.3.9 Determination of Total Phenolic Content	54
3.3.10 Determination of Total Flavonoid Content	54
3.3.11 Determination of Glucosinolate Content	55
3.3.12 Antioxidant Capacity using DPPH <sup>•</sup> Assay	56
3.3.13 Chlorophyllase Activity	57
3.3.13.1 Preparation of Chlorophyll <i>a</i> as a Substrate of Chlorophyllase Assay	57
3.3.13.2 Preparation Acetone Powder	58
3.3.13.3 Chlorophyllase Activity Assay	58
3.3.14 Determination of Catalase Activity	59
3.3.15 Determination of Peroxidase Activity	60
3.3.16 Determination of Superoxide Dismutase Activity	61
3.3.17 Determination of Ascorbate Peroxidase Activity	62
3.3.18 Determination of Hydrogen Peroxide Content	63
3.3.19 Determination of Glutathione Reductase Activity	63
3.3.20 Protein concentration	64

	<b>PAGE</b>
3.3.21 Statistical Analyses	64
3.3.22 Determination of O <sub>3</sub> Concentration in Water	64
<b>4. RESULTS</b>	<b>69</b>
4.1 Experiment I: The Effects of Sanitary Treatments on Microbial Growth and Visual Quality in Fresh-Cut Broccoli Florets during Cool Storage	69
4.1.1 Hot Water (HW) Treatments	69
4.1.1.1 Effect of HW on Microbial Populations	69
4.1.1.2 Effect of HW on Florets Color	71
4.1.1.3 Effect of HW on O <sub>2</sub> and CO <sub>2</sub> Levels in the Package and Respiration Rate	71
4.1.1.4 Effect of HW on Sensory Attributes	72
4.1.2 Vapor Heat (VH) Treatments	74
4.1.2.1 Effect of VH on Microbial Populations	74
4.1.2.2 Effect of VH on Florets Color	74
4.1.2.3 Effect of VH on O <sub>2</sub> and CO <sub>2</sub> Levels in the Package and Respiration Rate	76
4.1.2.4 Effect of VH on Sensory Attributes	77
4.1.3 Ozonated Water	79
4.1.3.1 Effect of Ozonated Water on Microbial Populations	79
4.1.3.2 Effect of Ozonated Water on Florets Color	79
4.1.3.3 Effect of Ozonated Water on Chlorophyll Changes	81
4.1.3.4 Effect of Ozonated Water on Sensory Quality Attributes	82
4.1.4 Sodium Chlorite (SC) Solutions	84
4.1.4.1 Effect of SC on Microbial Population	84
4.1.4.2 Effect of SC on Weight Loss, Respiration Rate and Florets Color	85
4.1.4.3 Effect of SC on Changes of Chlorophyll and Carotenoid Content	87
4.1.4.4 Effect of SC on Sensory Quality Attributes	89

	<b>PAGE</b>	
4.2	Experiment II: The Effects of Hot Water Combined with Sodium Chlorite on Microbial Growth and Visual Quality in Fresh-Cut Broccoli Florets during Storage	90
4.2.1	Effect of HW Combined with SC on Microbial Population	91
4.2.2	Effect of HW Combined with SC on Color of Florets	92
4.2.3	Effect of HW Combined with SC on Weight loss, Respiration Rate and O <sub>2</sub> and CO <sub>2</sub> Levels in Package	93
4.2.4	Effect of HW Combined with SC on Chlorophyll Content	94
4.2.5	Effect of HW Combined with SC on Sensory Quality Attributes	96
4.3	Experiment III: The Effects of Hot Water Combined with Sodium Chlorite on the Change of Bioactive Compounds in Fresh-Cut Broccoli Florets during Storage	97
4.3.1	Effect of HW Combined with SC on Total Ascorbic Acid, Ascorbic Acid and Dehydroascorbic Acid Content	97
4.3.2	Effect of HW Combined with SC on Chlorophyll Content	99
4.3.3	Effect of HW Combined with SC on Total Phenolic and Flavonoid Content	101
4.3.4	Effect of HW Combined with SC on Total Glucosinolate Content	102
4.3.5	Effect of HW Combined with SC on Antioxidant Capacity	104
4.4	Experiment IV: The Effects of Hot Water Combined with Sodium Chlorite on the Change of Antioxidant Activities in Fresh-Cut Broccoli Florets during Storage	105
4.4.1	Effect of HW Combined with SC on Chlorophyllase Activity	105
4.4.2	Effect of HW Combined with SC on Catalase Activity	106
4.4.3	Effect of HW Combined with SC on Peroxidase Activity	106
4.4.4	Effect of HW Combined with SC on Superoxide Dismutase Activity	107
4.4.5	Effect of HW Combined with SC on Ascorbate Peroxidase Activity	107

	<b>PAGE</b>
4.4.6 Effect of HW Combined with SC on Hydrogen Peroxide Content	108
4.4.7 Effect of HW Combined with SC on Glutathione Reductase Activity	108
<b>5. DISCUSSION</b>	<b>110</b>
5.1 HW Treatment	110
5.2 VH Treatment	112
5.3 Ozonated Water Treatment	113
5.4 SC Treatment	115
5.5 HW Combined SC Treatment	116
