

LIST OF TABLES

TABLE		PAGE
2.1	The reduction factor and the associated number of pieces for line, square and cube.	6
2.2	Properties of the value of Hurst exponent.	9
2.3	Comparison of the methods for estimating fractal dimension.	13
3.1	The locations of meteorological centers used for surface wind.	19
3.2	The locations for 850 hPa wind.	19
3.3	Experiment case.	20
4.1	Examples of fractal dimensions of 6-hourly surface wind direction at Bangkok.	21
4.2	Fractal dimensions of 6 hourly, daily maximum and daily minimum for surface wind speed and wind direction.	22
4.3	Fractal dimensions of surface wind.	23
4.4	Fractal dimensions of 6 hourly, daily maximum and daily minimum of 850 hPa wind speed and wind direction.	25
4.5	Fractal dimensions of 850 hPa wind.	26
4.6	Fractal dimensions of surface wind speed and wind direction for 6-hourly, daily maximum and daily minimum wind at Chiang Mai.	26
4.7	Fractal dimensions of surface wind speed and wind direction for 6-hourly, daily maximum and daily minimum wind at Ubon Ratchathani.	27
4.8	Fractal dimensions of surface wind speed and wind direction for 6-hourly, daily maximum and daily minimum wind at Phuket.	27
4.9	Fractal dimensions of surface wind speed and wind direction for 6-hourly, daily maximum and daily minimum wind at Songkhla.	28
4.10	Fractal dimensions of surface wind speed and wind direction for 6-hourly, daily maximum and daily minimum wind at Bangkok.	28
4.11	Average and standard deviation of yearly fractal dimensions of 6-hourly, daily maximum and daily minimum surface wind speed from 2003-2012 over Thailand.	30
4.12	Averages and standard deviations of yearly fractal dimensions of 6-hourly, daily maximum and daily minimum surface wind direction from 2003-2012 over Thailand.	31
4.13	Highest and lowest fractal dimensions of yearly (2003-2012) surface wind speed.	32
4.14	Highest and lowest fractal dimensions of yearly (2003-2012) surface wind direction.	33
4.15	Fractal dimensions of 850 hPa wind speed and wind direction for 6-hourly, daily maximum and daily minimum wind at Chiang Mai.	33

TABLE		PAGE
4.16	Fractal dimensions of 850 hPa wind speed and wind direction for 6-hourly, daily maximum and daily minimum wind at Ubon Ratchathani.	34
4.17	Fractal dimensions of 850 hPa wind speed and wind direction for 6-hourly, daily maximum and daily minimum wind at Phuket.	34
4.18	Fractal dimensions of 850 hPa wind speed and wind direction for 6-hourly, daily maximum and daily minimum wind- at Songkhla.	35
4.19	Fractal dimensions of 850 hPa wind speed and wind direction for 6-hourly, daily maximum and daily minimum wind at Bangkok.	35
4.20	Averages and standard deviations of yearly fractal dimensions of 6-hourly, daily maximum and daily minimum 850 hPa wind speed from 2003-2012 over Thailand.	37
4.21	Averages and standard deviations of yearly fractal dimensions of 6-hourly, daily maximum and daily minimum 850 hPa wind direction from 2003-2012 over Thailand.	38
4.22	Highest and lowest fractal dimensions of yearly (2003-2012) 850 hPa wind speed.	40
4.23	Highest and lowest fractal dimensions of yearly (2003-2012) 850 hPa wind direction.	41
5.1	10-year largest fractal dimensions of wind speed and direction.	42
5.2	Yearly largest fractal dimensions of wind speed and direction.	43
