

## ACKNOWLEDGEMENTS

I would like to express my appreciation thanks to my thesis advisor and my thesis co-advisor: Associate Professor Dr. Usa Humphries and Associate Professor Dr. Prungchan Wongwises for their inestimable help with constant encouragement throughout the course and problem solving of this research. I am most thankful for their suggest and advice, not only in my research but also many other methodologies in life. My research would not have achieved the support that I have always received from theirs. I most grateful to the examination Chairman of Thesis Committee and committee member: Dr. Chakrit Chotamonsak from the Department of Geography, Chiang Mai University, Dr. Chatchawan Watchararuangwit and Dr. Angkool Wangwongchai from Department of Mathematics, King Mongkut's University of Technology Thonburi for their suggestion and comments. In addition, I am grateful thank all of the lectures from King Mongkut's University of Technology Thonburi, who taught and adviced me and I would like to thank Dr. Sirapong Sooktawee for help about computer program and all suggestion. I would like to thank all my good friend for help and encouragement me throughout. Finally, I most gratefully acknowledge my parents support throughout the period of this research. I would not have succeeded and my research would not have been completed without support from my parents.
