

## LIST OF FIGURES

| FIGURE |  | PAGE |
|--------|--|------|
| 2.1    | WRF System Components (Skamarock <i>et.al.</i> , 2008)   | 7    |
| 2.2    | WRF Flow Chart (Dudhia <i>et.al.</i> , 2011)   | 8    |
| 2.3    | $\eta$ Coordinate of WRF Model (Skamarock <i>et.al.</i> , 2008).   | 9    |
| 2.4    | Thailand is Located in the Tropical Area between<br>Latitudes $5^{\circ} 37' N$ to $20^{\circ} 27' N$ Longitudes $97^{\circ} 22' E$ to<br>$105^{\circ} 37' E$  | 19   |
| 2.5    | Physical Process in the WRF Model (Skamarock <i>et.al.</i> ,<br>2008)  | 20   |
| 2.6    | Illustrates the Microphysical Processes (Warner, 2011)   | 22   |
| 3.1    | The Rainfalls Distribution Pattern from TRMM 3 Hourly<br>Observation Data at 0000 UTC 10 September 2011  | 27   |
| 3.2    | WRF Model Three Nested Domain with Terrain Height  | 28   |
| 3.3    | The Resolutions of Domain1 were $36 \times 36 \text{ km}^2$ and has<br>$412 \times 392$ Grids Spacing Covering at Latitude -<br>$20.8265^{\circ} N$ to $42.5789^{\circ} N$ and Longitude $66.9183^{\circ} E$ to<br>$133.567^{\circ} E$ | 29   |
| 3.4    | The Resolutions of Domain2 were $12 \times 12 \text{ km}^2$ and has<br>$703 \times 728$ Grid Spacing Covering at Latitude $-8.40932^{\circ} N$<br>to $30.888^{\circ} N$ and Longitude $82.5465^{\circ} E$ to $120.492^{\circ} E$       | 29   |
| 3.5    | The Resolutions of Domain3 were $4 \times 4 \text{ km}^2$ and has $667$<br>$\times 971$ Grids Spacing Covering at Latitude $4.4198^{\circ} N$ to<br>$21.8973^{\circ} N$ and Longitude $95.5056^{\circ} E$ to $107.506^{\circ} E$       | 30   |
| 3.6    | Study Domain with Terrain Height Cover at Latitude $5^{\circ} N$<br>to $21^{\circ} N$ and Longitude $97^{\circ} E$ to $106^{\circ} E$  | 30   |

## LIST OF FIGURES (Cont.)

| <b>FIGURE</b> |  | <b>PAGE</b> |
|---------------|--|-------------|
| 3.7           | Area Average Accumulate Rainfall Value of TRMM Observation Data from 2000 to 2012 and 2011 showed the Highest Values   | 31          |
| 3.8           | The Rainfall Pattern of TRMM Observation Data in 2011  | 31          |
| 3.9           | Area Average Accumulate Rainfall Value of TRMM Observation Data from January to December 2011  | 32          |
| 3.10          | The Rainfall Pattern of TRMM Observation Data in March 2011  | 33          |
| 3.11          | The Rainfall Pattern of TRMM Observation Data in September 2011  | 33          |
| 3.12          | The Rainfall Pattern of TRMM Observation Data in November 2011   | 34          |
| 3.13          | Area Average Accumulate Rainfall Value of TRMM Observation Data During 1 <sup>st</sup> -31 <sup>th</sup> March 2011  | 34          |
| 3.14          | The Rainfall Pattern of TRMM Observation Data on 28 <sup>th</sup> March 2011   | 35          |
| 3.15          | Area Average Accumulate Rainfall Value TRMM Observation Data During 1 <sup>st</sup> -30 <sup>th</sup> September 2011   | 35          |
| 3.16          | The Rainfall Pattern of TRMM Observation Data on 10 <sup>th</sup> September 2011   | 36          |
| 3.17          | Area Average Accumulate Rainfall TRMM Observation Data During 1 <sup>st</sup> -30 <sup>th</sup> September 2011   | 36          |
| 3.18          | The Spatial Pattern of TRMM Observation Data on 23th November 2011   | 37          |
| 4.1           | The Comparison of the Rainfall Distribution between the Area Average Original Results and The Area Average Re-Gridding Results at 0000 UTC, 1200 UTC 28 March 2011 and 0000 UTC 29 March 2011 of Exp01 | 45          |

## LIST OF FIGURES (Cont.)

| <b>FIGURE</b> |   | <b>PAGE</b> |
|---------------|---|-------------|
| 4.2           | The Comparison between Mean Area Average Original Results and The Mean Area Average Re-Gridding Results on 3 Hourly-Rainfalls During 0000 UTC 28 March 2011 to 0000 UTC 29 March 2011         | 46          |
| 4.3           | The Comparison of the Rainfall Distribution between the Area Average Original Results and The Area Average Re-Gridding Results at 0000 UTC, and 1200 UTC 10 September of Exp01                | 49          |
| 4.4           | The Comparison of the Rainfall Distribution between the Area Average Original Results and The Area Average Re-Gridding Results at 0000 UTC 11 September 2011 of Exp01                         | 50          |
| 4.5           | The Comparison between Mean Area Average Original Results and The Mean Area Average Re-Gridding Results on 3 Hourly-Rainfalls During 0000 UTC 10 September 2011 to 0000 UTC 11 September 2011 | 50          |
| 4.6           | The Comparison of the Rainfall Distribution between the Area Average Original Results and The Area Average Re-Gridding Results at 0000 UTC, and 1200 UTC 23 November 2011 of Exp01            | 53          |
| 4.7           | The Comparison of the Rainfall Distribution between the Area Average Original Results and The Area Average Re-Gridding Results at 0000 UTC 24 November 2011 of Exp01                          | 54          |
| 4.8           | The Comparison between Mean Area Average Original Results and The Mean Area Average Re-Gridding Results on 3 Hourly-Rainfalls During 0000 UTC 23 November 2011 to 0000 UTC 24 November 2011   | 54          |
| 4.9           | The Mean Correlation between Fourteen Experiments and TRMM Observation Data on 3 Hourly-Rainfalls During 0000 UTC 28 March 2011 to 0000 UTC 29 March 2011                                     | 56          |

## LIST OF FIGURES (Cont.)

| <b>FIGURE</b> |  | <b>PAGE</b> |
|---------------|--|-------------|
| 4.10          | The Mean of Mean Error between Fourteen Experiments and TRMM Observation Data on 3 Hourly-Rainfalls During 0000 UTC 28 March 2011 to 0000 UTC 29 March 2011          | 58          |
| 4.11          | The Mean of Mean Absolute Error between Fourteen Experiments and TRMM Observation Data on 3 Hourly-Rainfalls During 0000 UTC 28 March 2011 to 0000 UTC 29 March 2011 | 59          |
| 4.12          | The Comparison of Rainfall Distribution between Observation Data and EXP10 During 0000 UTC to 0600 UTC 28 March 2011   | 61          |
| 4.13          | The Comparison of Rainfall Distribution between Observation Data and EXP10 During 0900 UTC to 1500 UTC 28 March 2011   | 62          |
| 4.14          | The Comparison of Rainfall Distribution between Observation Data and EXP10 During 1800 UTC 28 March 2011 to 0000 UTC 29 March 2011                                   | 63          |
| 4.15          | The Different of Rainfall Distribution between Observation Data and EXP10 During 0000 UTC to 1500 UTC 28 March 2011  | 65          |
| 4.16          | The Different of Rainfall Distribution between Observation Data and EXP10 During 1800 UTC 28 March 2011 to 0000 UTC 29 March 2011                                    | 66          |
| 4.17          | The Mean Correlation between Fourteen Experiments and TRMM Observation Data on 3 Hourly-Rainfalls During 0000 UTC 10 September 2011 to 0000 UTC 11 September 2011    | 68          |
| 4.18          | The Mean of Mean Error between Fourteen Experiments and TRMM Observation Data on 3 Hourly-Rainfalls During 0000 UTC 10 September 2011 to 0000 UTC 11 September 2011  | 70          |

## LIST OF FIGURES (Cont.)

| <b>FIGURE</b> |  | <b>PAGE</b> |
|---------------|--|-------------|
| 4.19          | The Mean of Mean Absolute Error between Fourteen Experiments and TRMM Observation Data on 3 Hourly-Rainfalls During 0000 UTC 28 March 2011 to 0000 UTC 29 March 2011       | 71          |
| 4.20          | The Comparison of Rainfall Distribution between Observation Data and EXP10 During 0000 UTC to 0600 UTC 10 September 2011   | 73          |
| 4.21          | The Comparison of Rainfall Distribution between Observation Data and EXP10 During 0900 UTC to 1500 UTC 10 September 2011   | 74          |
| 4.22          | The Comparison of Rainfall Distribution between Observation Data and EXP10 During 1800 UTC 10 September 2011 to 0000 UTC 11 September 2011                                 | 75          |
| 4.23          | The Different of Rainfall Distribution between Observation Data and EXP10 During 0000 UTC to 1500 UTC 28 March 2011  | 77          |
| 4.24          | The Different of Spatial Pattern between Rainfall Distribution Observation Data and EXP10 During 1800 UTC 28 March 2011 to 0000 UTC 29 March 2011                          | 78          |
| 4.25          | The Mean Correlation between Fourteen Experiments and TRMM Observation Data on 3 Hourly-Rainfalls During 0000 UTC 23 November 2011 to 0000 UTC 24 November 2011            | 80          |
| 4.26          | The Mean of Mean Error between Fourteen Experiments and TRMM Observation Data on 3 Hourly-Rainfalls During 0000 UTC 23 November 2011 to 0000 UTC 24 November 2011          | 82          |
| 4.27          | The Mean of Mean Absolute Error between Fourteen Experiments and TRMM Observation Data on 3 Hourly-Rainfalls During 0000 UTC 23 November 2011 to 0000 UTC 24 November 2011 | 83          |

## LIST OF FIGURES (Cont.)
