ACKNOWLEDGEMENT

Firstly, I must appreciate my thesis advisor, Asst. Prof. Dr. Ariyaphong Wongnoppavich who really does deserve the greatest thanks since he has provided me incredible support, encouragement and guidance in both directing the research and writing this thesis. This thesis could not have accomplished without his understanding and kindly encouragement. Special appreciations are extended to Asst. Prof. Dr. Kongthawat Chairatvit from Faculty of Dentistry, Mahidol University for his guidance and knowledgeable comments through this study.

The work presented in this thesis was carried out at Faculty of Medicine, Chiang Mai University and the Faculty of Dentistry, Mahidol University. I would like to extend my thanks to all staffs of Biochemistry Department, Faculty of Medicine, Chiang Mai University and Oral Biology Department, Faculty of Dentistry, Mahidol University for their assistance on developing my lab skills. The special thanks to my friends at Biochemistry Department, Faculty of Medicine, Chiang Mai University and Oral Biology Department, Faculty of Dentistry, Mahidol University for their kindly help, friendship and cheerfulness during my study.

Finally, the author has really appreciated my family for their love and care, understanding, kindly encouragement and support that inspired me to reach the goal for graduation. Also, I will keep in mind for the love and care from the various other people whom I did not mention here.

Chakkrit Khanaree
