ACKNOWLEDGEMENT

First of all, I would like to express the deepest appreciation to my advisor, Asst. Prof. Dr. Kanokkan Bumroongkit who gave me the good advice, encouragement, and guidance to me from the beginning.

I am also grateful to Dr. Watcharee Tiangyou for the valuable comments, suggestions and corrections of the thesis.

My special thanks to my co-advisors, Assoc. Prof. Napaporn Tananuvat, Assoc. Prof. Dr. Umnat Mevatee and Asst. Prof. Dr. Chainarong Tocharus who gave me the important suggestions and persistence help in this study.

I would like to thank Prof. Dr. Nipon Chattipakorn M.D. for his kind support in the animal laboratory for the biopsy and transplantation process in rabbits. I also thank the Department of Anatomy, the Department of Physiology and the Laboratory Animal House, Faculty of Medicine, Chiang Mai University for providing the laboratory services.

Furthermore, I would like to thank Assoc. Prof. Nirush Lertprasertsuke M.D., Dr. Vipavadee Chaisuksunt, Dr. Manussabhorn Phassara and Miss Lamaiporn Peerapapong for their good suggestions about immunohistochemical staining techniques. I also thank all members in the Department of Anatomy for their instructions in laboratory techniques. Also special thanks to Miss Samorn Kongtien for her good friendship and valuable help.

I would like to express my appreciation towards my parents and family who have always been beside me, no matter where I am. Thank you for being so understanding, supportive and motivations. Moreover, I would like to thank my dear friends and colleagues, especially graduated students in the Department of Anatomy. It has been great to know you all and thank you very much for your kindness.

Daranee Promprasit
