Coordinator Advisor	Assoc.Prof.Dr.Supit Karnjanapan

ABSTRACT

This developmental research aimed to create web page for Oracle Database Technology and understand the satisfaction of the people who use Oracle Database Technology web page service. The samples were 40 of the specific sampling which divided into 4 groups, each group was comprised of 10 people. They were 10 students from computer engineering department, faculty of engineering, Chulalongkorn University, 10 students from computer engineering department, faculty of engineering, Prince Songkhanakarin University, 10 students from computer engineering department, faculty of engineering King Mongkut's University of Technology Thonburi and existing Oracle's customers.

The research instruments, were Oracle Database Technology web page, Evaluation qualitative web page (content), (media technique production) and questionnaires to analyzed the satisfaction of the users, developed by the researcher. The scores from service web page were then analyzed by arithmetic mean and standard deviation

The results of understand the satisfaction of the samples who use Oracle Database Technology have very satisfied about enjoy with use web page service but overall have fair satisfied opinion scale arithmetic mean equal 3.51 and standard deviation equal 0.76.
