Thesis Advisor	Mr. Nobpadol Suwachananonda

### ABSTRACT

The proposal of this thesis about the creation for the space and interior the Art room in the Demonstrate Schools under the Ministry of University Affair in Bangkok. Now there are 3 Schools that have use to be the sample for this study:

- 1) The Demonstrate School of Chulalongkorn University (Primary Education)
- 2) The Demonstrate School of the University of Sri Narakintavirote, Prasarnmitr
- 3) The Demonstrate School of the Kasetsart University, Vitaya Khet Bangkokhen (Primary Education)

This thesis has presented how to manage functional area that suitable for children in class 5<sup>th</sup> - 6<sup>th</sup> learning Art subject in the classroom. The results from the study conclude the concept for the art room's planning.

For this study, analyzed from the various theories and data keep from the real activities's survey in 3 Demonstrate schools (from the lists above) include the other choools. The main theme of this data from the observation thorough the mutual surrounding and concern about furniture planning from each school, such as the size of material that use in the art room and keep the questionnaire from children and teachers about the facilities in the classroom. The sample groups have selected from random method: collect from the students and teachers in Class 5<sup>th</sup> - 6<sup>th</sup> about 60 sets each school. The data from various sample groups be analyzed and composed the different between schools.

From the survey an questionnaire: show us that the art room have to create different from the general classroom. The lay-out furniture in the art room usually set to be groups that up to tecnical learning for various presentations such as Painting group, Carving Group, Printing

Group, etc. and the result from the analyzed, the area that suitable for one child is about 1.3 - 2 m<sup>2</sup>. The art room have to be set far from misy place and have more light than general classroom, and set the basins made from easy - maintainance material that can stand-still in heavy duty. The color for furniture should be use an attractive colors that good for learning Art.

Recommendation about the appropriate shape for the art room that should be use "Rectancular" shape that good for create space and lay-out furniture because the activities in the class have to change all the time for serving technique of teaching for each teacher. From the analization, the rectancular shape is easy to create space more than other shapes. So, the sample model that presented in this thesis suitable to apply to use in the art room in various schools for the future.
