ABSTRACT

The purpose of this research was to study working condition of assistant directors in charge of planning and development of Eastern Technical Colleges as stated by to the opinion of administrators and teachers on 6 aspects, which are preparation, planning, plan developing, detail writing, implementing, monitoring and evaluating, and to compare the opinion on job performance of assistant directors in charge of planning and development of the administrators and teachers.

The samples of the study were 64 administrations and 257 teachers from 16 Eastern Technical Colleges.

Instruments for the research were two-part questionnaires. The first part dealt with respondents' general data. The second part consisted of questions on working condition of assistant directors in charge of planning and development by those six catagories. The statistics techniques employed to analyze the data were frequency, percentage, means, standard deviation and t-test using SPSS/PC+ program (Statistical Package for the Social Sciences / Personnel Computer Plus)

Research findings :

1. The working condition of assistant directors in charge of planning and development of Eastern Technical Colleges on planning activities is moderate in overview, but considering 6 types of working job found that the range from the highest to lowest means are developing of plan, planning, preparation of planning, detail writing of plan, implement of plan, and plan monitoring

2. The opinion of administrators and teachers of Eastern Technical Colleges to the working condition of assistant directors in charge of planning and development had significantly difference at the .05 level in overview, and the arithmetic means of the opinion's level of administrators was higher than teachers, but has no difference in developing of plan and plan monitoring.
